**Welcome to  
Hitachi Cooling  
& Heating  
Climate-control  
solutions**

**Over 100  
years of  
history and  
culture**

**Japanese  
technology**

**15 factories  
around the  
world**

**Born in  
Japan, with  
a global  
presence**

Hitachi is the global brand for premium climate-control solutions, renowned for its ability to create unique spaces, understand installation requirements, and provide customer satisfaction.

By designing, engineering and manufacturing reliable, efficient, high-quality heating and cooling systems, we help people find their optimal air-conditioning solution, always meeting their expectations.

Our goal is to create a world where, thanks to our cutting-edge Japanese technology, people can live in harmony with themselves, their families, and the environment around them.

To ensure its global reach, Hitachi has 15 factories\* around the world, producing the various Hitachi climate-control ranges and components: residential, commercial, heating, VRF, chillers and compressors.

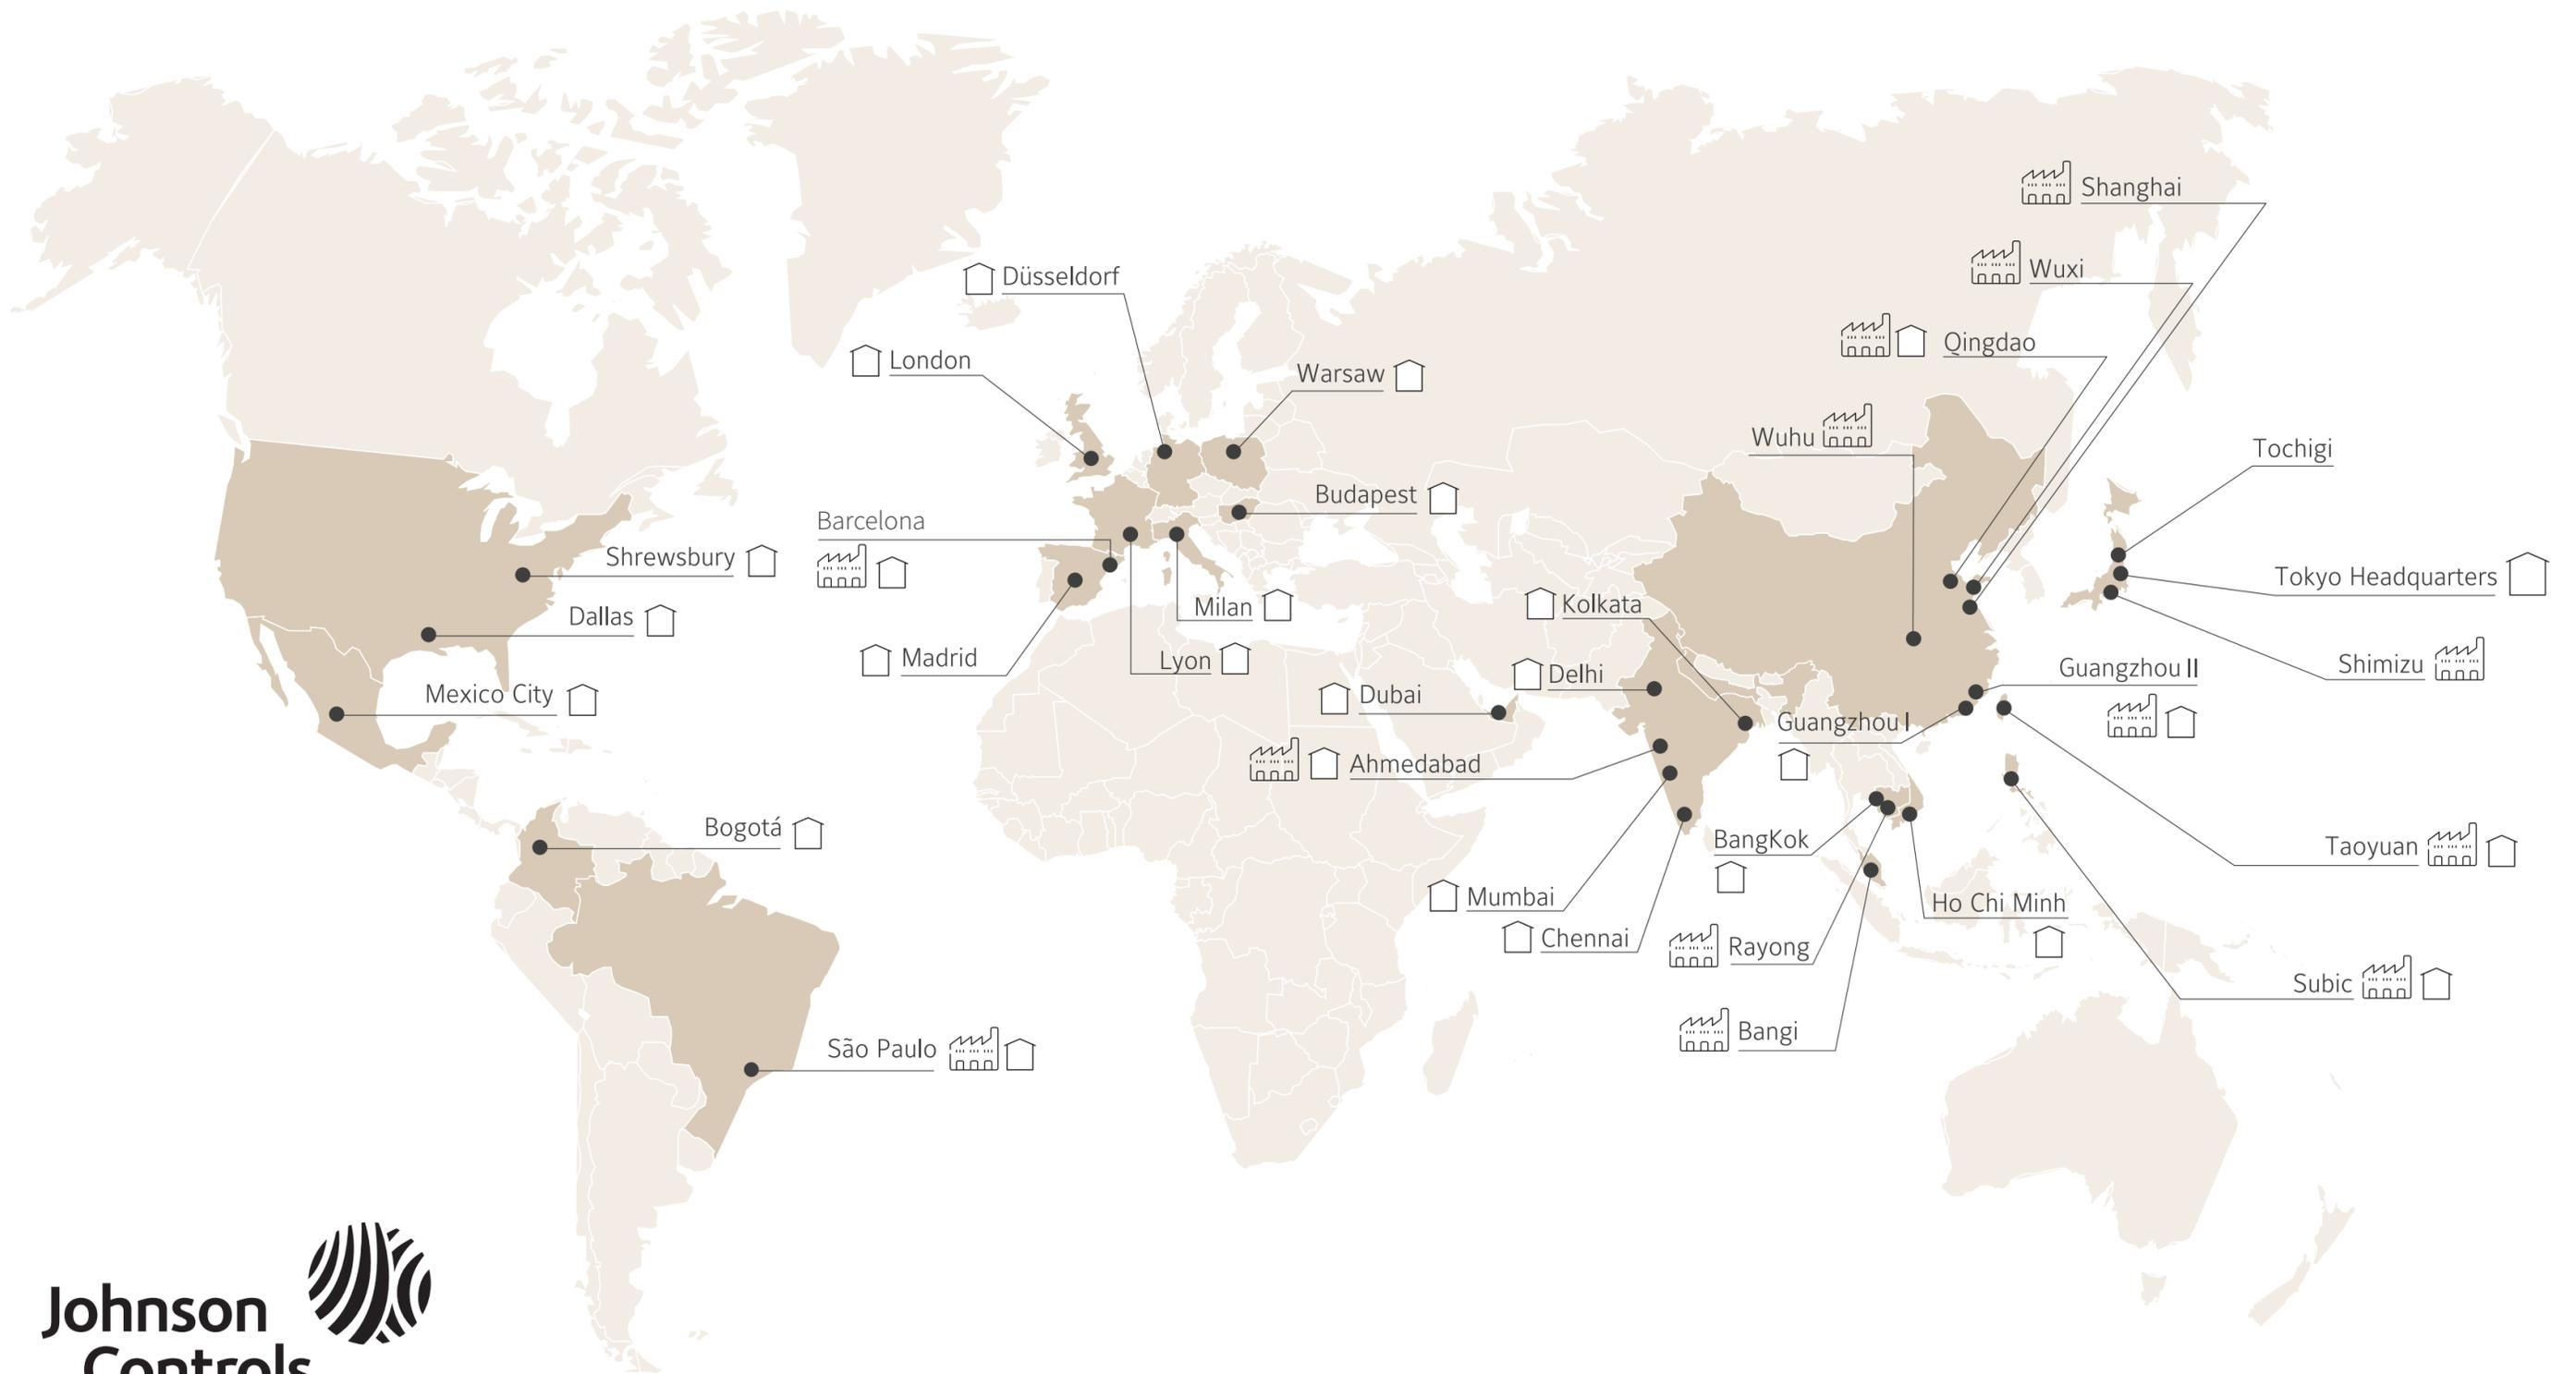

\* Including joint ventures.

# Global climate-control solutions from Hitachi factories

Introduction

Introduction

**HITACHI**  
Air conditioning solutions

# Hitachi's European factory in Spain

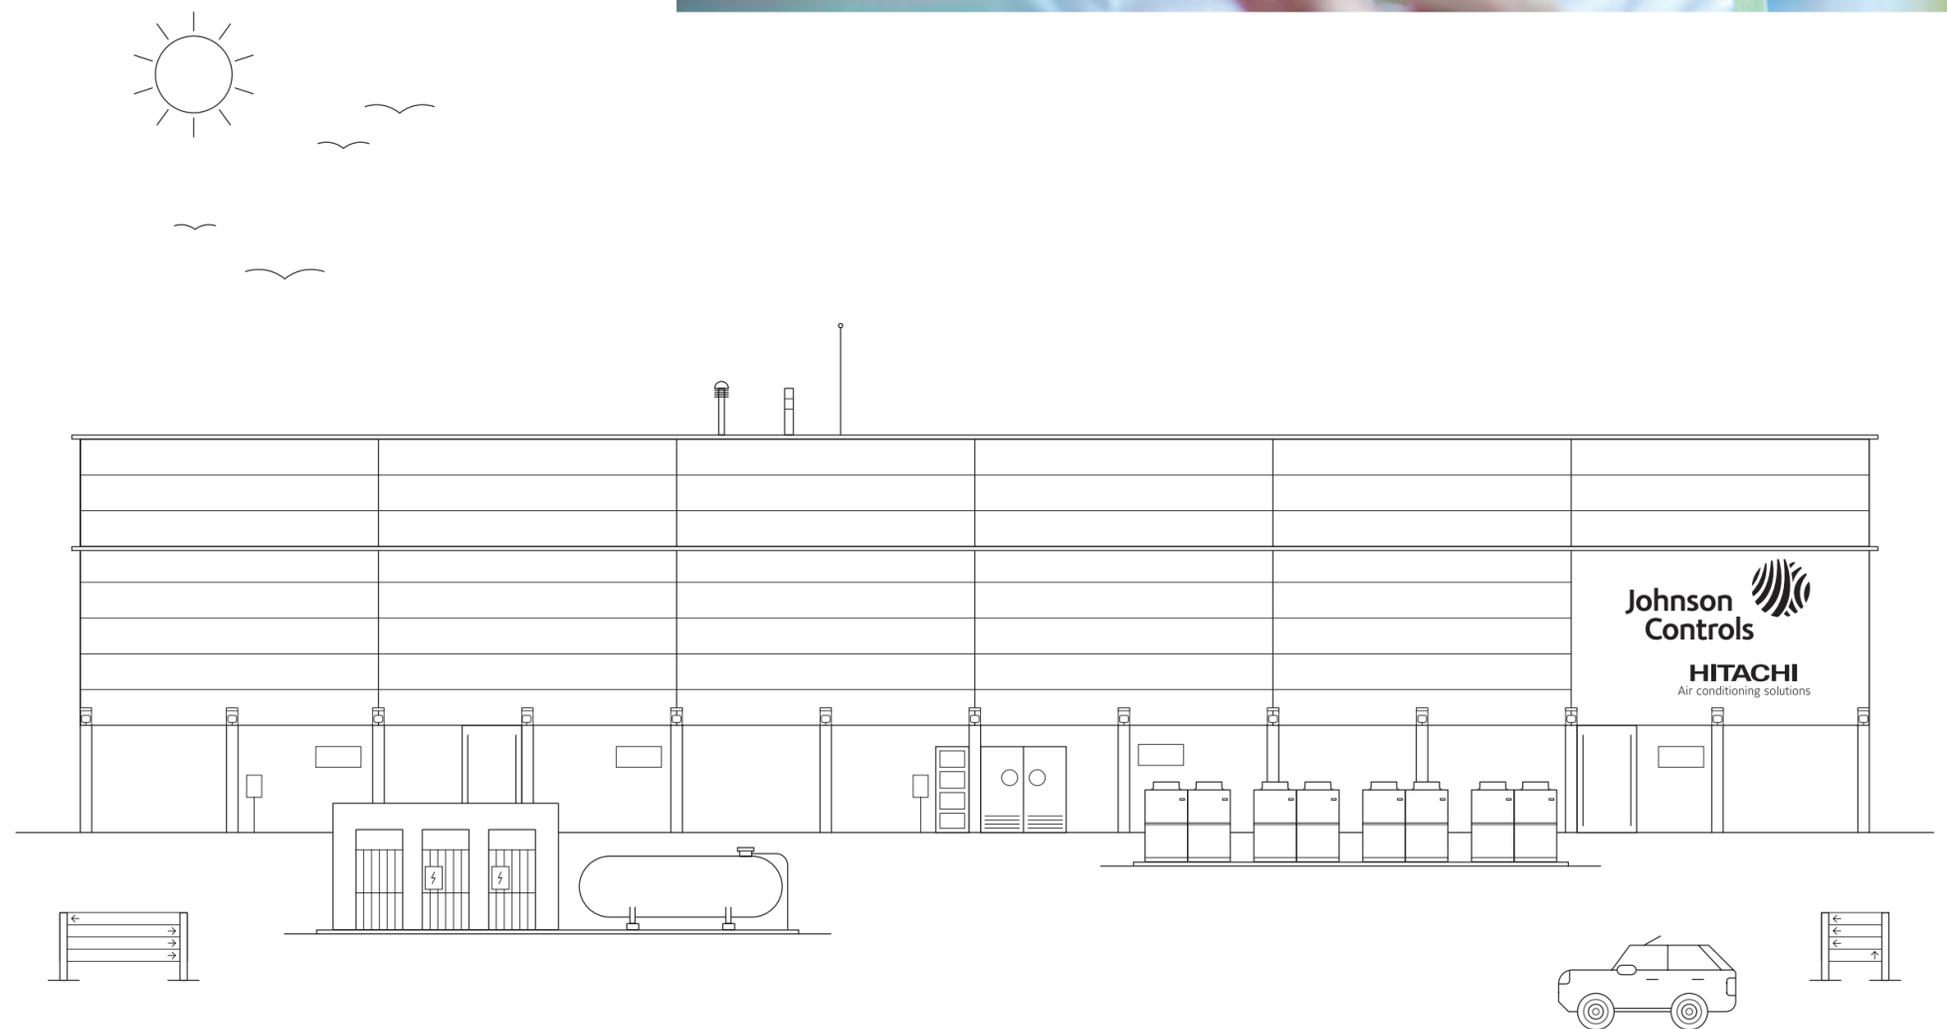

A look behind the scenes...

The Spanish factory in Vacarisses, Barcelona is responsible for designing, manufacturing and inspecting each climate-control unit. It also supplies equipment to Europe, Africa, Australasia and parts of South America.

Its location allows us to control the design and manufacturing process to ensure our units meet the highest quality, reliability and durability standards for our customers. We also offer fast delivery and high-availability of spare parts, and direct contact with the design area.

The factory currently produces the following product lines: Samurai L Chillers, VRF systems, Yutaki heat pumps, IVX commercial range and the System Free indoor units, representing almost the entire portfolio of Hitachi equipment.

We design cutting-edge technology to meet your needs and desires

Johnson Controls Hitachi Air Conditioning Europe offers the world's most complete range of climate-control, heating and air-conditioning products.

Always at the forefront of technology, Johnson Controls Hitachi Air Conditioning Europe develops high-technology products for an environment with maximum comfort in any situation. From professional or domestic environments to industrial climate control. From new constructions to renovation products. At Hitachi Cooling & Heating, you will always find a solution. In addition, respect for the environment is also one of our priorities, from the design of the product to its production, through installation and startup. Whatever your expectations are, the Hitachi network is there to support you and offer you the right solutions.

**15,000**  
employees worldwide

**2019**  
Double digit growth in Europe

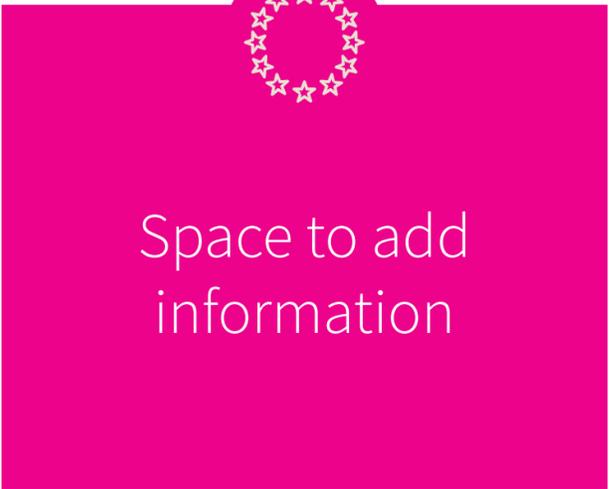

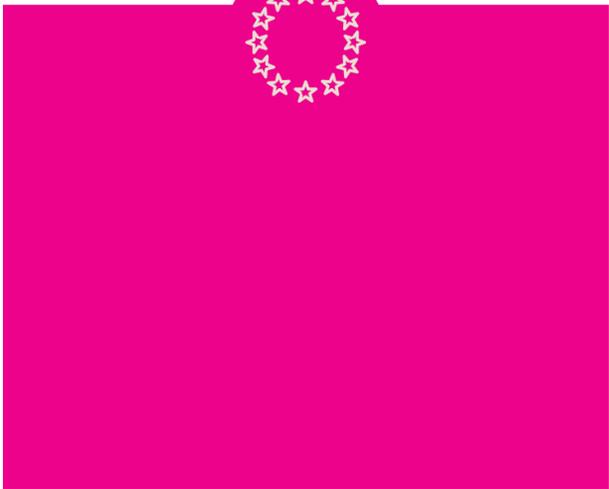

**15 factories\***  
owned by Johnson Controls Hitachi around the globe. Factory in Barcelona for the whole of Europe

More than **200** partners across Europe & Northern Africa

\* Including joint ventures.

More than **40 000m<sup>2</sup>** of manufacturing footprint in Europe

**KIWA**  
Certification to testing laboratory V for heating

**MSC**  
Certification to testing laboratory II for heating

**Eurovent Certification**  
(WC commercial test) to water chilled laboratory

**Zero Waste to Landfill**  
(Johnson Controls unique certification)

Over **1 200** employees across the region

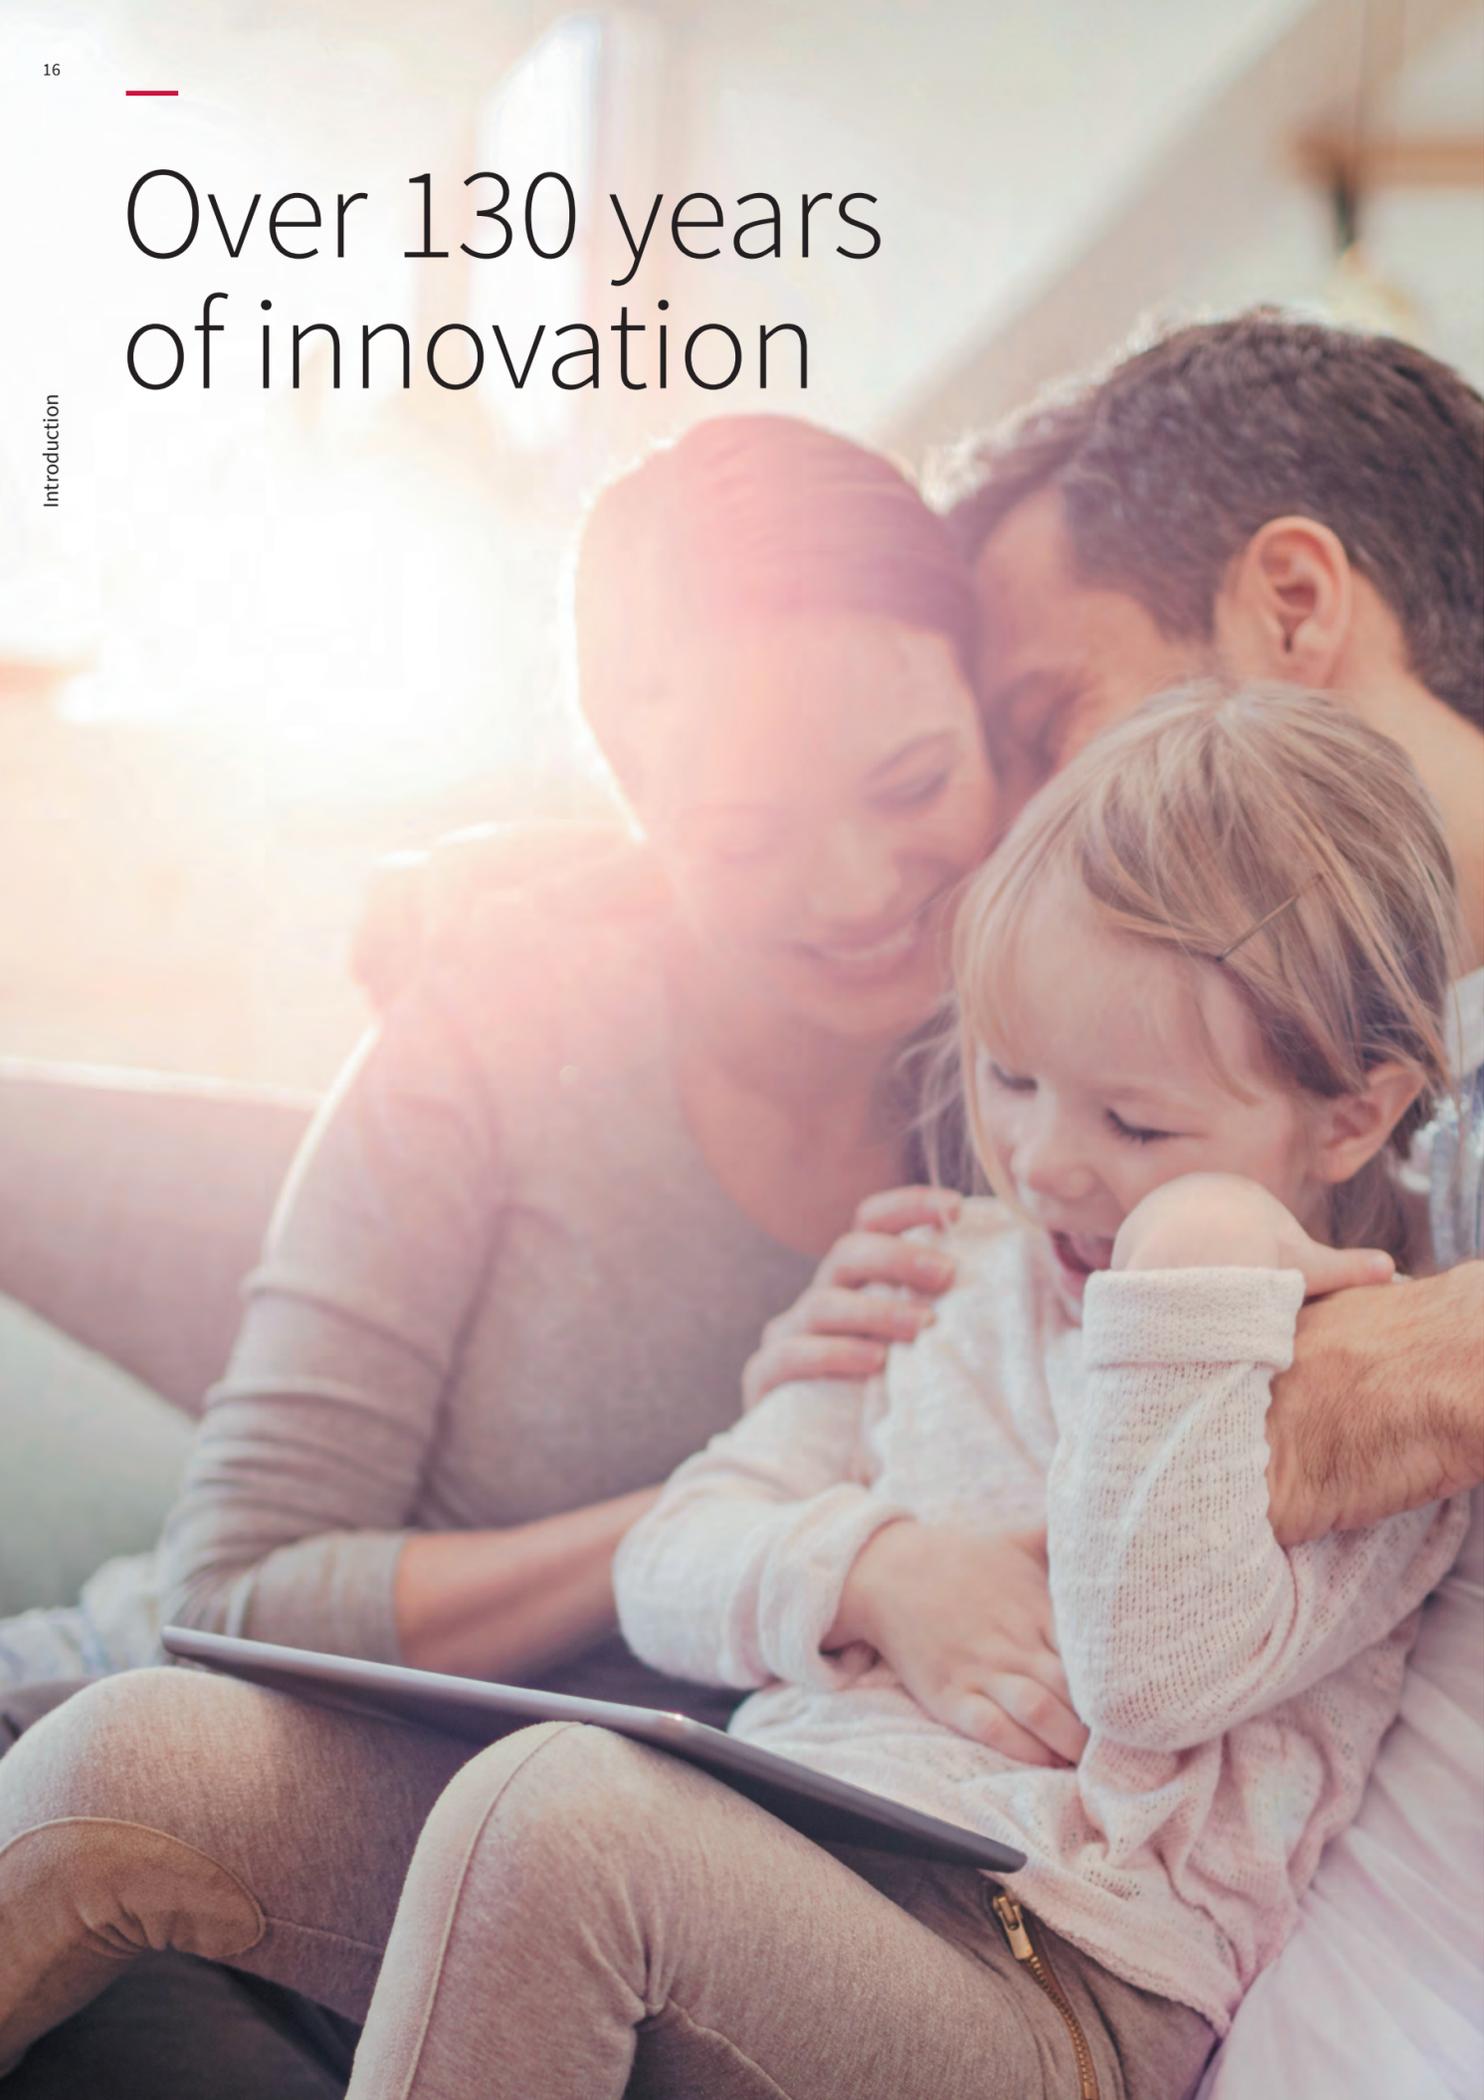

Sales offices or partners in **44** countries across Europe and Northern Africa

**9** training centers in the region

# Over 130 years of innovation

- 1883**  
In 1883, Warren S. Johnson registered a patent for the first electric thermostat. His invention launched the Johnson Controls building-control sector.
- 1910**  
In 1910, Namihei Odaira founded an electrical repair shop at Kuhara Mining in Hitachi (Ibaraki, Japan). The company has been a technology leader ever since.
- 1936**  
First fully climate-controlled office building with air conditioning.
- 1952**  
First air conditioner in Japan.
- 1958**  
First monobloc centrifugal chiller with water-cooled condenser.
- 1962**  
First heat pump in Japan.
- 1978**  
First chiller with variable speed drive.
- 1983**  
First DC inverter air conditioner.
- 1999**  
First graphic user interface (GUI) panel on a refrigerator.
- 2005**  
With the acquisition of the York® brand, the Group becomes the leading one-stop supplier of heating, ventilation, air-conditioning and refrigeration solutions.
- 2006**  
- First multi-split on the market with 6 outlets.  
- First air-to-water heat pump.
- 2008**  
- First console designed for the heating market.  
- First UTOPIA IXV on the market.
- 2010**  
Johnson's headquarters earns LEED Platinum certification. This green building label, given to cutting-edge programs of energy and environmental design, is developed by the United States Green Building Council.
- 2011**  
- First thermal-energy reservoir on the market.  
- First 2-pipe / 3-pipe VRF on the market.
- 2013**  
First high-temperature air source heat pump.
- 2014**  
- First air source heat pump with DHW service and heating.  
- Eurovent certificate for VRF.
- 2015**  
On October 1, launch of the new company Johnson Controls Hitachi Air Conditioning.
- 2016**  
- New range of YUTAKI residential air-to-water air source heat pump range.  
- Hi Kumo app for PAC units.
- 2017**  
New Hydrofree solution: DHW production in VRF.
- 2018**  
- Multi T solution, the first solution with a thermal energy reservoir and direct expansion units.  
- New VRF SIGMA range.  
- Complete new range of Samurai chillers.
- 2019**  
- FrostWash: freezes and eliminates dust, mold and bacteria for fresh, clean air.  
- Side flow VRF, the only solution on the market with horizontal-discharge heat-recovery systems.  
- Yutaki R32, air source heat pump with R32 for a more sustainable world.

# Hitachi High technology

**FROST WASH™** **FrostWash**  
Automatic cleaning of wall-mounted exchanger

With this technology, the heat exchanger automatically freezes to eliminate all the impurities and maintain optimal performance.

**CONSTANT POWER** **Constant Power**  
Maintaining output down to -15°C ambient

Thanks to "Constant Power" technology, the exclusive design of our outdoor units is able to maintain output capacity at up to -15°C on the outside and operate at up to -25°C outside.

**Yutaki Smart Cascade**  
Intelligent regulation for greater energy efficiency

Hitachi has an exclusive smart control, consisting of two refrigeration stages with R410A and R134A. Its functionality automatically changes, either to R410A only or to cascade (activating the second stage with R134A if necessary).

**Wizard**  
Intuitive configuration assistant

With the wizard you can quickly configure Yutaki installations to adapt them to any environment: pool, boiler combination, solar...

**4-Way Swing**  
Balanced horizontal and vertical

A technology that offers even more comfort in the Performance Wall-Mounted range.

**Vector Control**  
Patented Hitachi system

Optimizes the operation of compressors on outdoor units to achieve unbeatable performance.

**Hibernation**  
Intelligent regulation for outdoor units

Able to achieve a 70% reduction when stopped.

**GENTLE COOL** **Gentle Cool**  
No cold drafts

This function restricts the off-temperature air to prevent cold drafts and ensure greater comfort.

**2-PIPE/3-PIPE OR** **2-pipe/3-pipe concept**  
Total flexibility

Outdoor units designed to work in applications in Heat-Pump or Heat-Recovery mode

**SYSTEM FREE** **System Free**  
Flexibility

System Free indoor units come with a switch, as standard, that allows them to adjust as finely as possible when they start up.

**POWER SWITCH** **Power Switch**  
Adaptability

All the outdoor units of our tertiary range (Mono-split and VRF) are compatible with the indoor units and all the tertiary-supply control systems.

**Smooth Drive Control**  
Comfort & Savings

This function is used to control the speed of the compressor down to 0.1 Hz, to guarantee the most constant possible comfort temperature.

**Self-adjusting evaporation temperature**  
Energy saving

The Sigma range is equipped with a regulation that optimizes cold-start energy consumption while guaranteeing optimal comfort.

**Smart defrosting**  
More comfort in heating mode

Thanks to new integrated electronics, in the Sigma outdoor units, the continuous heating periods are twice as long as they are in conventional systems (up to 250 mins). Defrosting time is reduced, ensuring optimal comfort.

**All-included Smart buildings**  
Tertiary solutions

The standard electronics integrated in all contacts (input/output) mean it can be integrated in all cases.

**Occupancy sensor**  
Savings

Detects human activity to keep energy costs down

# R32 refrigerant, the new-generation green refrigerant

## R32 regulation and specifications.

The goal of the European Regulation on Refrigerants (F-Gas) and the European Directive on ErP (energy-related products) is to achieve a 20% reduction in global greenhouse-gas emissions by 2030 and to gradually restrict the quantities emitted in CO2 equivalent, which it is possible to put on the market. These new regulations therefore encourage the use of products containing fluids with a lower global warming potential (GWP).

The inclusion of the R32 refrigerant in our Hitachi units coincides with F-Gas objectives, while at the same time

helping to contribute to a more sustainable world and allowing our customers to enjoy these same benefits. Since 2013, Hitachi Cooling & Heating has dominated this technology and has produced R32 units for more than 40 countries.

**In 2019, Hitachi Cooling & Heating expanded its offer, including the refrigerant R32 in a larger selection of products to offer its customers more quality, performance, longevity and comfort.**

## Hitachi Cooling & Heating ranges with R32

Choose the most eco-friendly presentation

Hitachi Cooling & Heating units with R32 are compatible with all residential installations, as well as tertiary applications, and category-5 ERT and ERP.

## R32 ranges are...

### Those with the highest energy benefits

R32 has excellent thermal properties and greater energy efficiency compared to R410A, as it is 5 to 10% more efficient. R32 equipment performs better than equipment running R410A. Our R32 units earn an additional energy class.

### Greener solutions

On the one hand, R32 is a solution that is three times more ecological than R410A, with a GWP of 675 compared to a GWP of 2088 for R410A. Its carbon footprint is three times smaller than that of R410A, so its impact is three times as low on global warming.

On the other hand, this fluid also has zero impact on the ozone layer: ODP (ozone depletion potential) = 0.

### Use of a pure fluid

R32 is a pure fluid, so it is easy to recycle. It also means the gas is easier to handle when charging, as it can be charged in both liquid and gaseous state, unlike R410A (which must always be charged in liquid state).

In terms of R32 installation and maintenance methods, they are still relatively identical to those of R410A, as both these fluids have very similar pressure ranges. (Design pressure: R410A = 4.15 MPa / R32 = 4.29 MPa.)

### Safety approved

R32 belongs to the A2L safety class, which means it is non-toxic yet mildly flammable, with a maximum combustion speed of under 7 cm/s, so it is safe to use in most air-conditioning and heating applications.

R32 is not explosive and the risks of combustion and fire spread are very low (as low as all gases in domestic appliances). In fact, R32 is inflammable if the following three elements are present: Concentration in air > 0.307 kg/m<sup>3</sup> + oxygen content + combustion source.

However, only people with experience should handle gases under pressure and it is important to observe the safety standards for use.

Handling and installation of units with R32 requires special precautions and adapted equipment:

Pressure gauge with scale adapted to R32

Fluid-recovery bottle adapted for refrigerant

Station adapted for fluid recovery.

Electronic leaks detector

#### Precautions to keep in mind:

- Make sure there are no leaks so that no oxygen gets into the refrigerant.
- Ventilate the site of installation to reduce the concentration of gas in the room in case of problems.
- Regularly check for airtightness of the system and the quantity of refrigerant.

# Quality you can count on

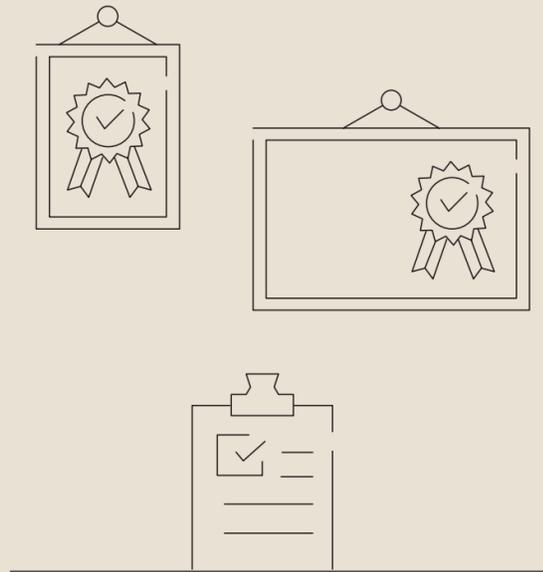

How do you view that quality in our products?

The different parts of our units are manufactured with the highest-quality materials sourced from carefully chosen suppliers. This is how you obtain worry-free lifelong climate control.

## Quality control

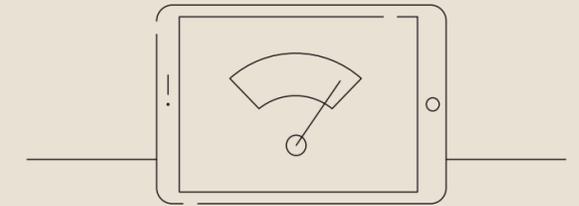

Just as you do in each installation, we test the climate-control units one by one, without sampling. This is how you obtain standards of quality and guaranteed reliability in all our equipment.

## No waste is sent to a landfill

100% of the waste generated at the factory is recycled or its value increased. That way, our factory makes the most of its waste, contributing to environmental sustainability.

## Certified performance

All our seasonal efficiency levels are certified by the Eurovent and Keymark certification programs.

We support your own commitment to sustainability

## Automatic centralized spare parts warehouse

Our new spare parts warehouse in our European factory delivers optimal access to spare parts and we have a policy in place to keep spares for 10 years after the discontinuation of the unit for most units.

## Refrigerant

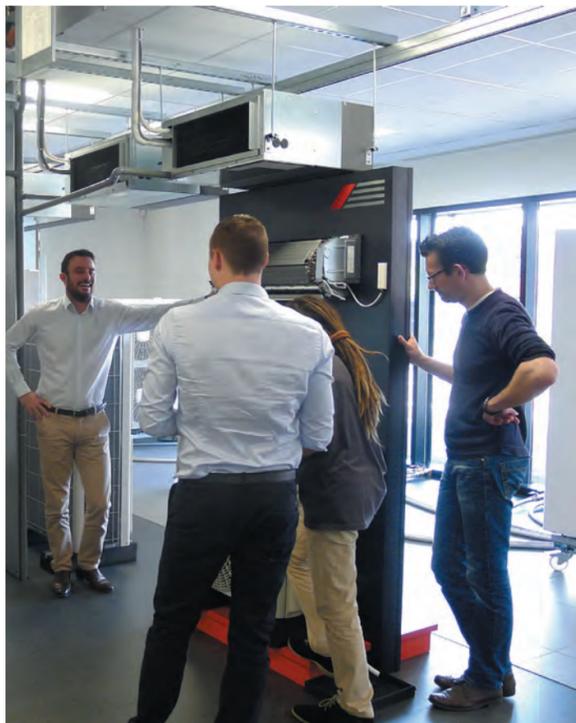

To help you with your commitment to the environment, a feature of many of our units is that they need less refrigerant to work, so they make a positive contribution to nature and society.

# Technical training at Hitachi

## Whatever your goals are, at our training centers we offer:

- In-depth knowledge of our products and the principles of their installation.
- Full mastery of the products
- Become an expert in the specific areas you need and be able to make accurate diagnoses of the products.

## Educators: quality pedagogy and equipment

With their experience, your trainer will combine theory with practice so that you will end up with specific know-how at the end of the course.

At the Hitachi training center, our units (mono-split, multi-split, VRF, SET FREE and air-to-water heat pumps) are installed in real conditions to enable you to handle the products that are actually in operation.

# BIM

**The digitalization of the construction sector** is increasing evidence of the proximity to design based on BIM (Building Information Modeling). To begin with, since December 17, 2018, all building construction projects with government financing in excess of two million euros are required by law to be executed in BIM.

Currently, as of July 26, 2019, all infrastructure construction projects with government financing must be executed in BIM.

The goal for 2020 is to have all public equipment and infrastructure of projects, new works and refurbishments presented in BIM.

## What exactly is BIM (Building Information Modeling)?

BIM is a model designed to optimize the design, execution and management of construction, including integration with specific electronic methods and instruments, in the scope of the design of the building and its structure. With BIM we can process all the relevant data of the construction and present the results available at each stage of the process in an open digital format.

The mandatory use of specific electronic methods and tools is aimed at rationalizing the planning and the related verification activities, improving and removing processes that up to now have affected the times and means of participating in tenders.

Important construction data are collected, combined and compiled digitally, in order to have a visualization with a three-dimensional geometric model.

BIM is not only used in the sector of design and construction (architecture, engineering, technical implementations), but also in resource management.

# The peace of mind you need with Hitachi support

## The official Hitachi technical service

Because we know you are looking for quick, efficient response, our Official Hitachi Technical Service is quick to tackle any type of incident. The professionals who receive constant training by Hitachi at the European factory in Barcelona know the entire Hitachi range from top to bottom, and are capable of responding to any query or incident that might arise.

**48 HOURS: Technical support's maximum response time**

Hitachi offers a technical support period of two business days, from the time we receive the technical support request at our service department, unless circumstances are beyond Hitachi's control.

### Ever-available stock of spare parts

Spare parts delivery, maximum two business days after receiving the order, unless circumstances are beyond Hitachi's control. These delivery times are possible thanks to an ever-available stock of spare parts. Hitachi guarantees the availability of functional spare parts for a period of ten years from the final manufacture date of each series.

### Include country contact detail

#### Call us on:

T: 900 844 480  
Hours: M-T 9:00-18:30; F 9:00-14:30

#### Or if you prefer, write to us at:

asistencia.tecnica@jci-hitachi.com  
administracion.spain@jci-hitachi.com

#### If you need spare parts, write to:

recambios@jci-hitachi.com

## Eurovent Certification. First Japanese manufacturer to certify its products at Eurovent

Hitachi's climate control systems are Eurovent certified for full reassurance in any type of application. Certification guarantees the performance of our systems under the most demanding conditions, as it complies with European legislation, giving consultants, fitters and end users the peace of mind that the systems they have selected will perform as specified.

Being in the directory of products certified by Eurovent means being a manufacturer that offers transparency and efficiency across the entire business chain.

Remember to ask for the Eurovent certificate for your equipment.

Recycling of electrical and electronic devices.

The Ecotic Foundation provides an integrated ECOinstallers management system for the service of collecting and handling air-conditioner waste.

Get rid of your electrical appliances at your nearest local waste facility for recycling

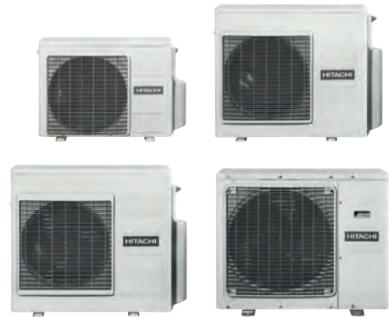

Call 900 103 281 or write to:  
soporte@ecotic.es

# HITACHI

# Residential Innovations

## Multi-split range with combinations of 2 to 5 indoor units and a power rating of up to 11 kW

A new range of high-performance indoor units with R32 that can be combined with multi-split and mono-split units.

## Lorai Wall-Mounted

New Lorai wall-mounted range with a unique design that incorporates the novel FrostWash function developed by Hitachi for evaporator self-cleaning.

P. 110

## RAI-RPE cassette from 2.5 to 6 kW

Innovative range of 600 x 600 R32 cassette units that incorporate individual control of the vent louvers. Compatible with multi-split and mono-split.

P. 95 - P. 144

## RAD-RPE duct from 2.5 to 6 kW

The new range of R32 ducts allows adjustment of the available static pressure up to 150 Pa. Compatible with multi-split and mono-split units.

P. 174

## RAF-RXE console from 2.5 to 5 kW

The Takai console also uses R32, but with a higher performance level.

P. 93 - P. 127

## Triple C

An innovative solution designed to combine air conditioning, heating and DHW production using the same outdoor unit.

P. 86

## Wall-Mounted R32 Light Commercial range from 5 to 7 kW

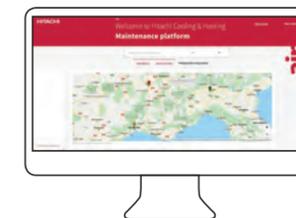

Wall-mounted units with the Human Sensor series occupancy detector in all power options, with multi-split and mono-split.

P. 118

## Yutaki R32 range, 2, 2.5 and 3 metric HP

We are expanding our Yutaki R32 range to include a new compact unit: the 2 metric horsepower Yutaki M. P. 46 - P. 52 - P. 72

## Hi Kumo PRO

Our app-based remote-control solution makes it possible to integrate our air-conditioning units with Yutaki units.

P. 108

# Innovations in VRF Systems

## Wall-Mounted RPK

A harmonious design with a range of power options from 0.4 to 4 metric HP and lower noise levels.

P. 276

## VRF Set Free Mini

A wide range of power options in horizontal discharge systems, from 4, 5 and 6 metric HP outdoor units with two-pipe systems, to 8, 10 and 12 metric HP outdoor units with three-pipe systems.

P. 244

## Wired controls

Now with more functions, including the new GENTLE COOL, which prevents cold drafts in the indoor unit, with an adjustable setpoint temperature at intervals of 0.5°C.

P. 336

## CSNet Manager centralized controls

Our CSNET centralized controls, revamped and expanded to control anything from small solutions to large buildings.

P. 340

## New BACNET & KNX & MODBUS gateways

Preset communication gateways, certified and more direct for easier integration.

P. 337

## Samurai Chillers

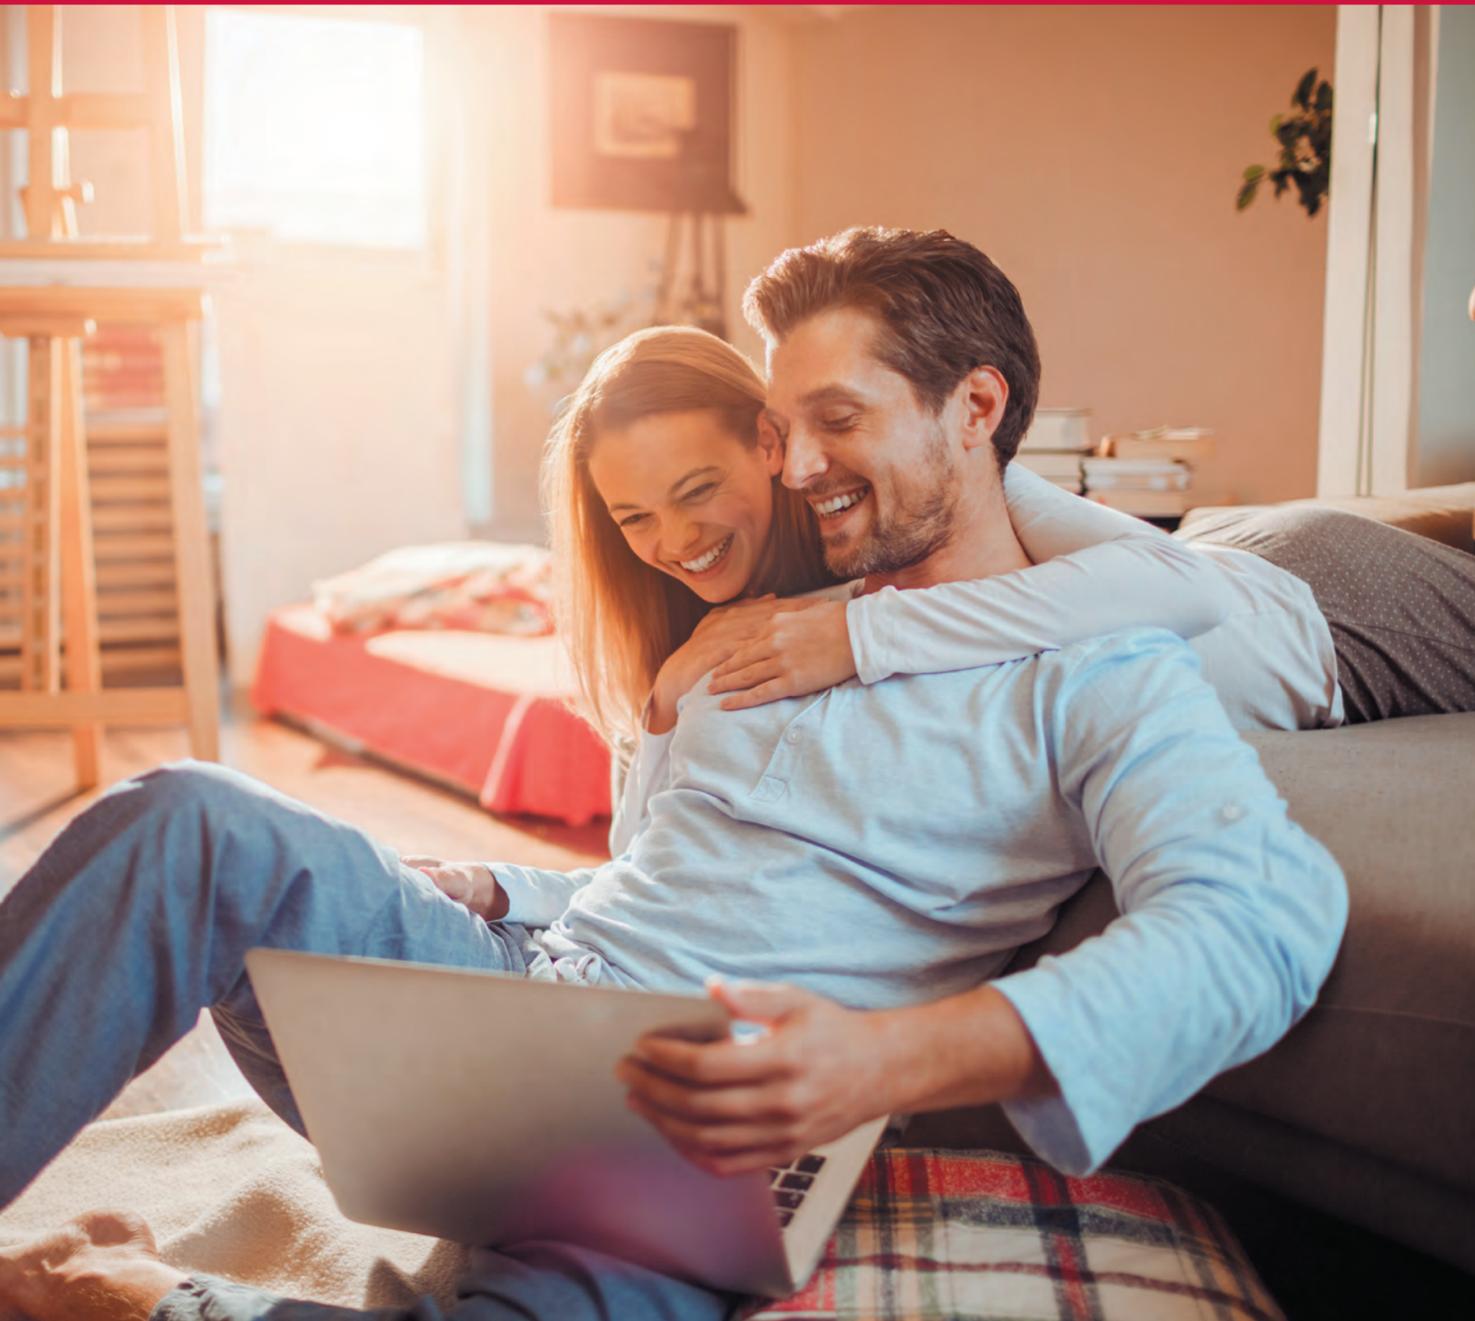

Our Samurai chillers with screw compressors and scroll inverter. Power ranges from 12 to 4000 kW.

P. 358

Compliant with F-Gas regulations, our new R32 Hitachi are part of our commitment to the environment. We have been getting ready for these changes since 2013 by developing R32 solutions in Japan.

A range designed for commercial applications is also available in R410A in order to meet the regulatory challenges facing ERP.

# Takai

Power and comfort in complete harmony

Takai

## Motion sensor

Technology saving you money thanks to the motion sensor which continuously analyses if anybody is in the room. If nobody is detected after 20 min, the temperature setting is moved by one degree and by a further degree after 40 min. (Fig. 1)

## 4 Way Swing

Thanks to the vertical and horizontal flap movement, air distribution is more regular, making the room more comfortable. (Fig. 2)

## Constant Power Technology

CONSTANT POWER technology was specially developed by HITACHI. It improves the performance of your heat pump and can maintain its heating capacity up to an outside temperature of -15°C and ensure heating up to -20°C. (Fig. 3)

## Double ventilation blade

In order to ensure a pleasant and more regular air flow in the room, the Takai features a double ventilation blade. This double blade ensures discrete comfortable air flows, preventing the unpleasant 'oscillating ventilator' effect.

## FrostWash Technology

The Takai was designed to provide effective air purification throughout the year with its exclusive and innovative function: FrostWash. It automatically and regularly cleans the heat exchanger for the distribution of clean and pure air.

## Low sound level

The Takai's indoor units were designed with a sound level from 20dB(A) for very discrete operation.

Wall

## Ultra compact

With an overall width of only 78 cm, it is the most compact unit on the market. It will blend in perfectly with your interior and can simply be installed above a door. (Fig.3)

## 4 Way Swing

Thanks to the vertical and horizontal flap movement, air distribution is more regular, making the room more comfortable. (Fig.1)

## Motion sensor

Technology saving you money thanks to the motion sensor which continuously analyses if anybody is in the room. If nobody is detected after 20 min, the temperature setting is moved by one degree and by a further degree after 40 min. (Fig. 2)

## Compatible with the Hi Kumo remote control

This application allows you to turn the unit on or off, raise or lower the temperature or set the timer from wherever you may be around the world. All you need is a smartphone, an Internet connection and Wi-Fi equipment (optional) to connect to the equipment.

## FrostWash Technology

The Mokai was designed to provide effective air purification throughout the year with its exclusive and innovative function: FrostWash. It automatically and regularly cleans the heat exchanger for the distribution of clean and pure air.

## Silent operation

Enjoy complete comfort without even noticing that the indoor unit is on, thanks to its low sound level of only 20 dB(A)\*.

# Light Commercial Wall

A range of functions to adapt to all configurations

## 4 Way Swing

Thanks to the vertical and horizontal flap movement, air distribution is more regular, making the room more comfortable. (Fig. 1)

## Motion sensor

Technology saving you money thanks to the motion sensor which continuously analyses if anybody is in the room. If nobody is detected after 20 min, the temperature setting is moved by one degree and by a further degree after 40 min. (Fig. 2)

## Improved comfort

The SPX-WKT3 wired controller can be used to select the location where the temperature setting should be measured (on the controller, the recirculation or with the average of both values). This feature will improve the comfort in your room.

## Flexible installation

The indoor unit can be installed in any location within the building because refrigerant pipe lengths go up to 30 m between the indoor unit and the outdoor unit. The height difference between the two can also go up to 20 m.

## Compatible with the Hi Kumo remote control

This application allows you to turn the unit on or off, raise or lower the temperature or set the timer from wherever you may be around the world. All you need is a smartphone, an Internet connection and Wi-Fi equipment (optional) to connect to the equipment.

## Compact indoor unit

The indoor unit is only 900 mm wide so it can be installed anywhere without interfering with other elements.

Fig. 1

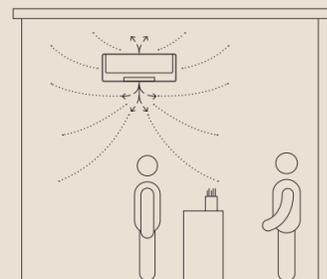

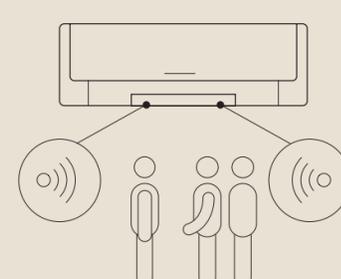

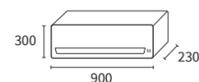

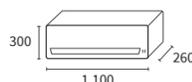

Fig. 2

# Micro VRF IVX Comfort

A compact VRF solution to meet larger technical constraints

## Optimum air distribution

The 4 ventilation speeds adapt the air flow for greater comfort in each room.

## Easy and discreet integration

Compact and lightweight, our units can be installed discreetly above a door. Their new design brings improvements including replacing the turbine without removing the exchanger and easier access to the filters.

## Simplify control

Our wall units are compatible with all types of controllers and come with an infrared receiver as standard.

## Wide operating ranges

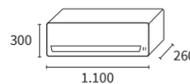

This equipment can operate in heating mode up to -20°C and up to 46°C in cooling mode. A heating-only mode is also available.

## Compact

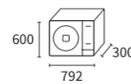

The outdoor units are exceptionally compact, taking up just 0.23 m<sup>3</sup> of floorspace.

## Compatible controls and accessories (see DRV Controls tab)

Ideal for residential applications, the Shirokuma console is able to reach comfortable heating and cooling temperatures in a few minutes. Its elegant and simple design means it fits in with all interiors.

# Console

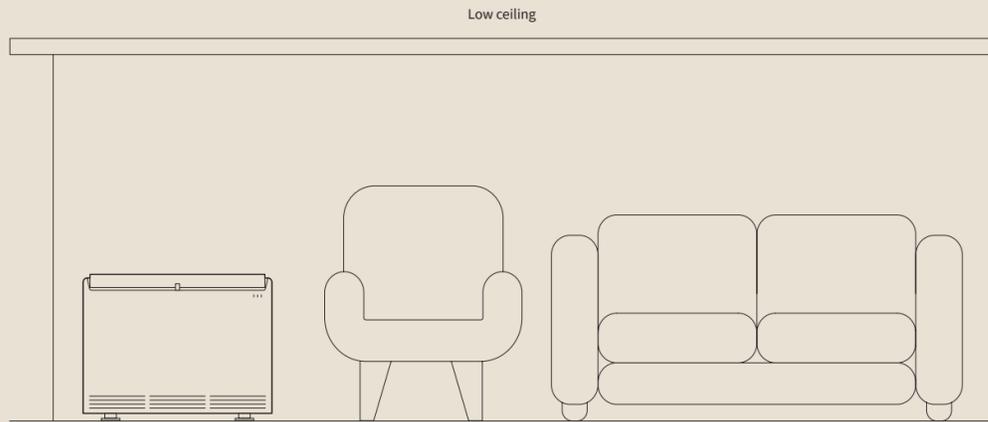

## 1 A unique design to fit in with all types of interiors

Its design means the unit is as unobtrusive as possible and can even be installed in the wall.

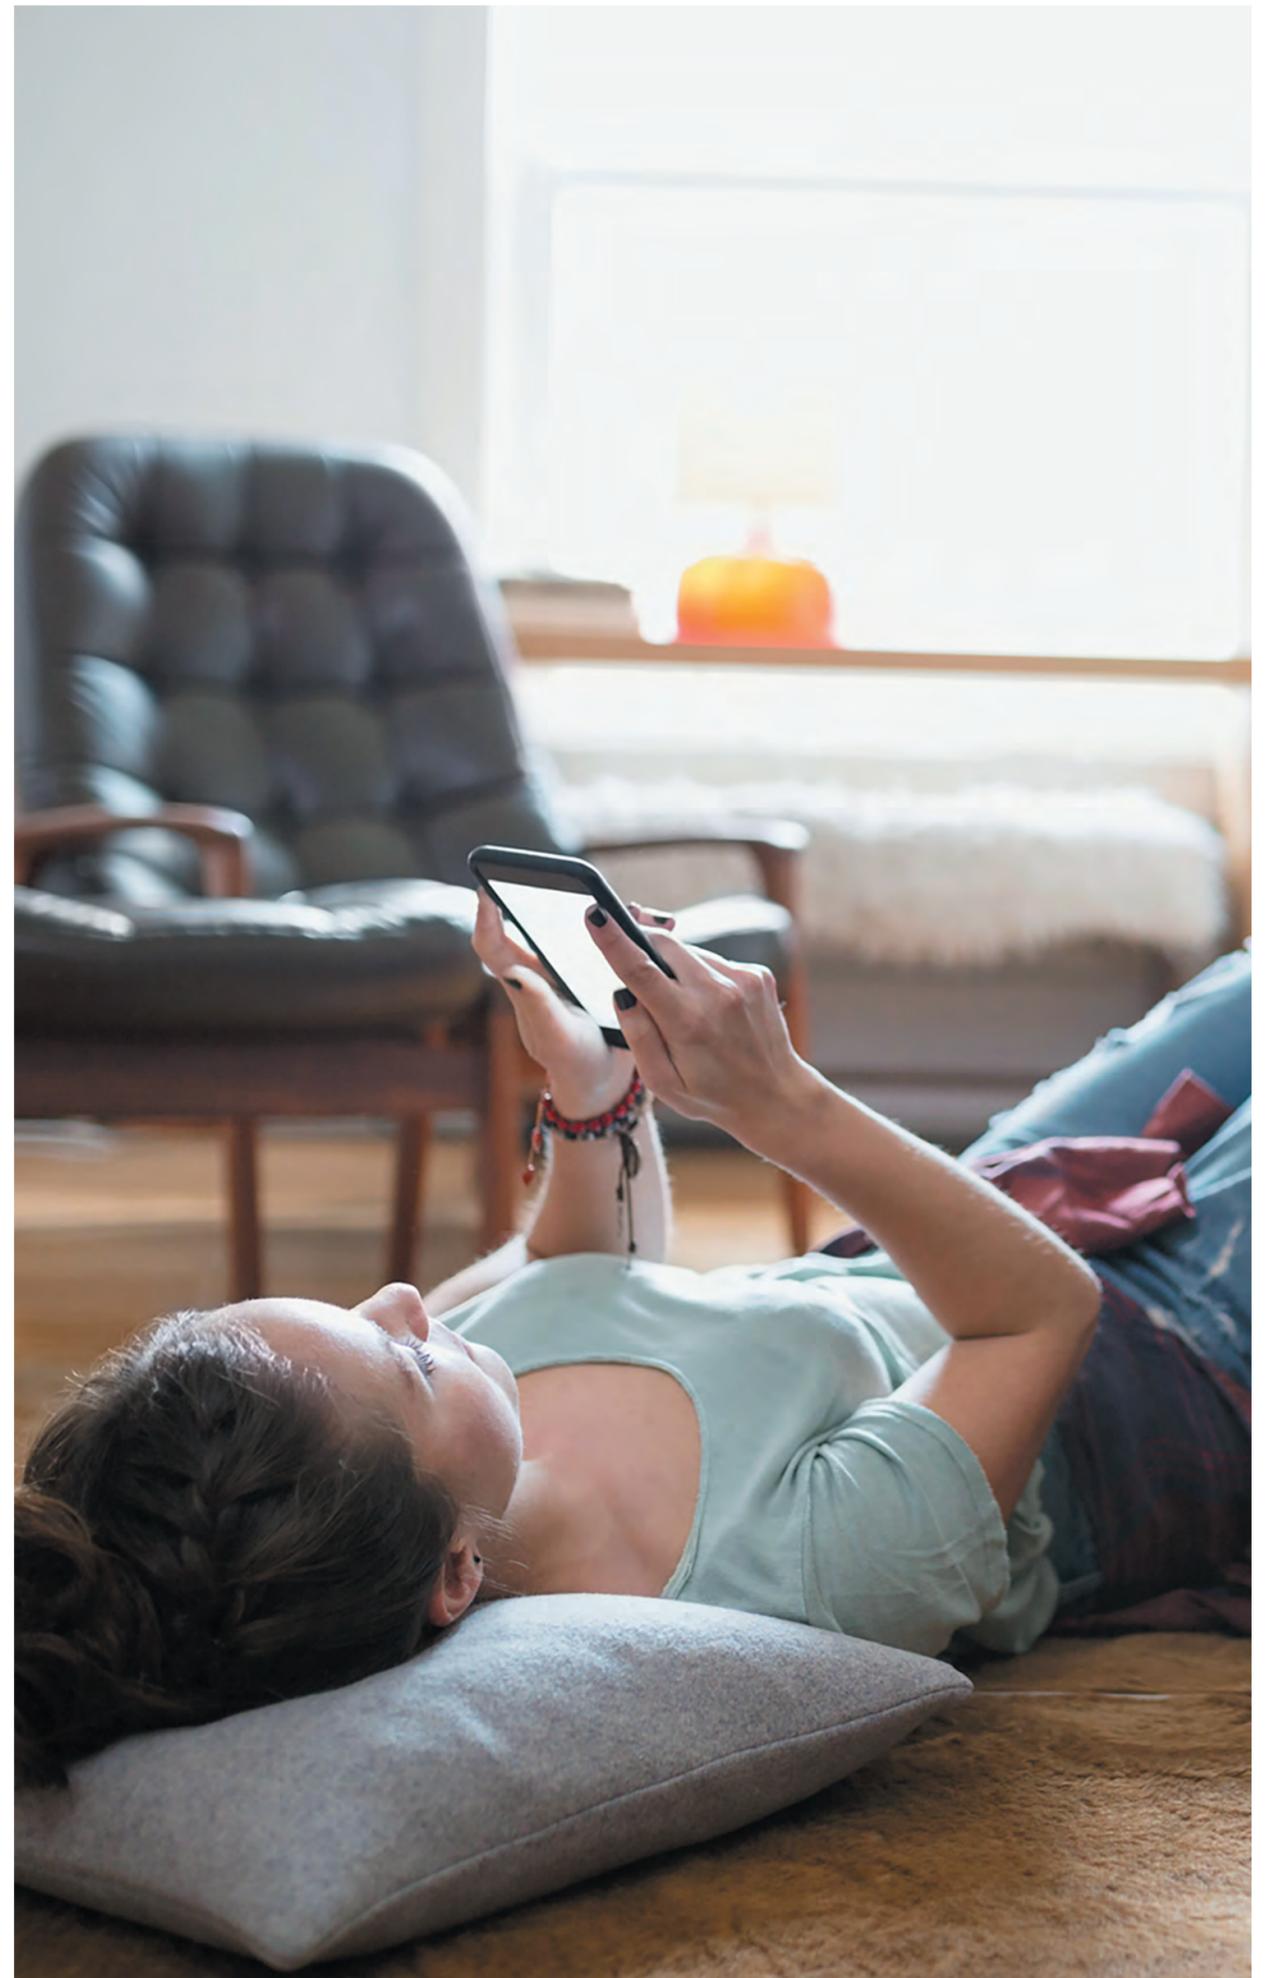

## 2 The ideal unit for smaller spaces

With their compact design, consoles are particularly suited for installation in smaller rooms.

## 3 Greater heating comfort

The distribution of hot air towards the lower part of the room means the temperature setting is reached quickly and constantly.

# Shirokuma console

High-performance equipment with unique design

## Extended air flow

Thanks to a larger **dynamic air flow**, air can reach all parts of the room. The room is air-conditioned (heating or cool air) at the touch of a button on the controller. (Fig. 1)

## Flexibility with the Multizone range

The Shirokuma console indoor unit is compatible with all Multi-split outdoor units. This means that several indoor units can be installed in different rooms with the same outdoor unit.

## High performance

The console's energy class is A+++.  
Energy savings - guaranteed!

## Control options

The console comes with a wireless controller as standard. It is also compatible with the wired controller SPX-WKT3 with hourly programming.

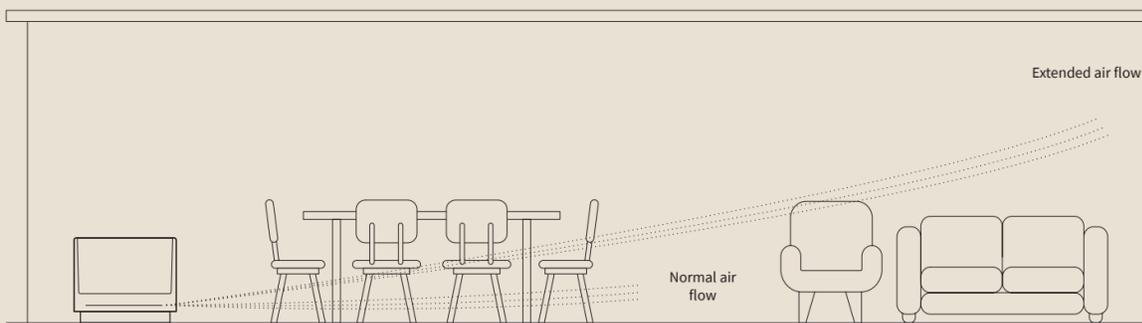

## Flexible installation

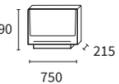

Wall-mounted or floor standing on base (supplied)

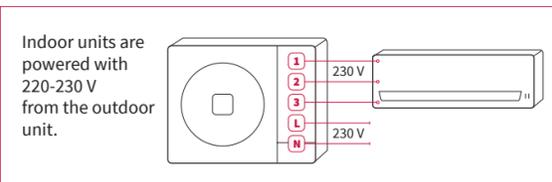

## Compatible with Hi Kumo

The entire Hitachi residential range is compatible with the Hi Kumo system which can control equipment from **any mobile device** which acts as a controller.

A ducted unit combines comfort and design. With this type of installation, the grills are the only elements visible in the room, allowing for harmonious integration with all types of designs.

Combined with a "zoning solution", the ducted unit can provide heating and cooling for different rooms from a single indoor unit.

This solution is ideally suited for commercial buildings, but also residential applications, wherever discretion is important. Our large range available in both R410A and R32 means there is something for every project.

# Light commercial ducted

The high-performance and discreet luxury solution

Light commercial ducted

## Installation in new builds with a VMC HYGRO B

Hitachi were validated with the CSTB and obtained the ducted ATEC so this solution can now be installed in new builds with a VMC HYGRO B ventilation system.

## Condensate pump included

The ducted unit has its own condensate pump for automatic condensate removal, so you don't have to worry about adding additional units to the installation. (Fig. 1)

## High static pressure

The ducted unit has a pressure of 150 Pa so that you can install it in the location of your choice. This way, users don't have to worry about a sufficient quantity of air arriving in the room which is furthest away.

## Flexible installation

The indoor unit can be installed in any location within the building because refrigerant pipe lengths go up to 30 m between the indoor unit and the outdoor unit. The height difference between the two can also go up to 20 m.

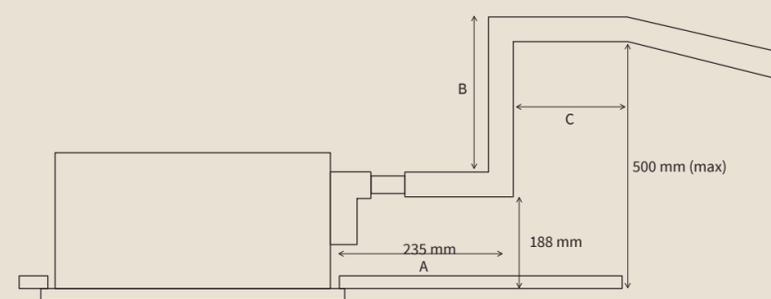

## Compatible with the Hi Kumo wireless controller

This application allows you to turn the unit on or off, raise or lower the temperature or set the timer from wherever you may be around the world. All you need is a smartphone, an Internet connection and Wi-Fi equipment (optional) to connect to the equipment.

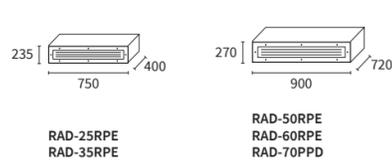

## Airzone compatibility

With a single ducted unit, users can control up to 6 rooms individually using Airzone's motorized plenums which fit directly to the Hitachi units. This compatibility means you can use the full Airzone ambient control range. (See P. 140).

# Primary R32

R32 ecofriendly option for your commercial applications

Sizes 5 and 6 HP Single-phase available from October 2020.

Primary R32

## Integrated condensate pump

With a discharge head of 700 mm, these ducted units are easily integrated in most projects.

## Flexible air circulation from below or behind

This solution offers genuine installation flexibility depending on the type of configuration. Equipment air circulation can be modified from below or behind. This does not require a change of equipment, simply an adjustment of the static pressure. (Fig. 1)

## Wide static pressure adjustment range

Wide static pressure range (up to 120 Pa) for long ducts and multizone applications means more practical and more flexible installation.

## Long refrigerant links and large height differences

With up to 50 m of ducts for an installation up to 30 m high, the Primary range offers great flexibility when it comes to installation configuration. (Fig.2)

## Efficiency guaranteed

The Primary ducted range performances are guaranteed in cooling and heating until an outside temperature of -15°C. The DC Inverter technology precisely adjusts the capacity required to heat residential or commercial premises and ensures the installation's comfort and durability.

## Automatic reboot after a power outage

When power returns after an outage, all pre-configurations are maintained and air-conditioning operates based on previous configuration.

Ducted

# Micro VRF IVX Comfort

A compact VRF solution to meet projects with larger technical constraints

## Integrated condensate pump

Hitachi ducted units are fitted as standard with a condensate pump up to 850 mm, offering greater flexibility during installation (models up to 6 HP).

## Flexible air circulation from below or behind

This solution offers genuine installation flexibility depending on the type of configuration. Equipment air circulation can be modified from below or behind on sizes 2 to 6 HP by role switching. (Fig. 1)

## New air

In order to improve indoor air quality, an Econofresh kit can be combined with the ducted unit to ensure new air management (see Econofresh P. <DB>).

## Wide static pressure adjustment range

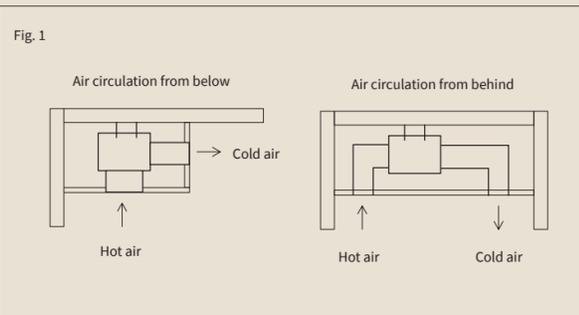

Static pressure available up to 120 Pa, with 3 level options, including zero pressure for air delivery on the grill.

## Airzone compatibility

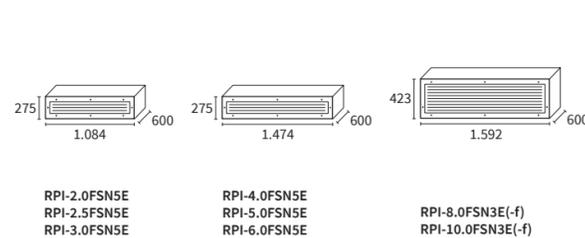

A single ducted indoor unit can handle up to 6 zones individually thanks to the Airzone motorized plenums and their control solutions (see P. 140).

## Compact

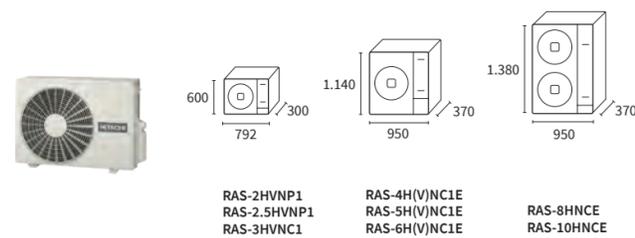

The outdoor units are exceptionally compact, taking up just 0.23m<sup>3</sup> of floorspace.

The kit includes the indoor unit, wired control and the outdoor unit.

Kit	(pre-tax)								
-----	-----------	--	--	--	--	--	--	--	--

The kit includes the ducted unit, wired controller PC-ARFP1E and the outdoor unit.

**Version M0**  
 Models RPI-8.0FSN3E(-f) and RPI-10.0FSN3E(-f) recommended for a ducted installation in a 1<sup>st</sup> group ERP (category 1 to 4):  
 - Either in a room larger than 300 m<sup>2</sup>;  
 - Or in a system supplying several rooms smaller than 300 m<sup>2</sup>.

## Compatible controls and accessories (see DRV Controls tab)

- Simplified wired control PC-ARH1E
- Wireless controller PC-AWR
- User-friendly multifunction wired control PC-ARFP1E

- Others:**
- Remote sensor THM-R2AE
  - Input/output configurable contact connectors PCC-1A
  - Condensate removal kit DBS-26 (models IVX Comfort 4HP) DBS-12L (models IVX Comfort 2/2.5/3HP)
  - Air circulation below (RPI-0.6~1.5FSN5E) D-ICA15/(RPI-0.4FSN5E) D-ICA04
  - Motion sensor for Ducted Low Height SOR-MSK

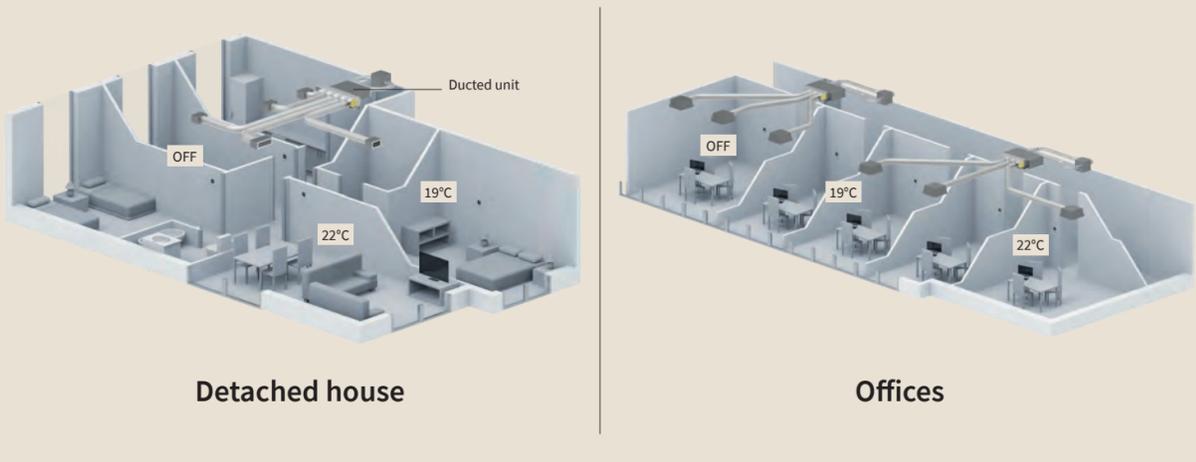

# Zoning solution

## Precise temperature control in each room from a single ducted unit!

A single ducted unit allows you to control up to 6 rooms individually thanks to the motorized plenums which fit directly to the Hitachi units.

## Ideal for residential and commercial applications

## A range of benefits with the zoning solution!

### Simplified installation

- Plug & Play solution.
- Pre-cabled motorized plenums.
- Fewer indoor units to install.

### Improved comfort

- Up to 6 rooms can be controlled individually.
- Temperature adjustment by 0.5°C increments.
- Temperature maintained at 0.3°C for both heating and cooling.
- New air intake possible on the standard model.

### Ideal for new builds and renovation

- RT2012: certified eu.bac with CA certified 0.3K.
- Heating version only for applications RT2012.
- Reversible version for comfort all year round.
- Eligible for tax deduction\*: 30% CITE/reduced French sales tax 5.5%.

\* Please go to [impots.gouv.fr](http://impots.gouv.fr) for more details

## Connected and user-friendly interfaces

### Airzone Blueface thermostat

Wired connection/3.5" touchscreen: Configurable as Main or zone thermostat. Numerous functions and settings, ideal for maximum control of your entire system: more efficient and responsible heating. Complete and user-friendly interface. Eco-adapt function and standby function for real energy savings. Control the temperature, operating mode and ventilation speed. Timer. Access forecasts (via the Webserver Airzone Cloud connection) to anticipate weather changes.

### Airzone Think thermostat

Wired or wireless connection/2.7" screen: Configurable as Main or zone thermostat. Low consumption device: the easy way to cut energy costs. Attractive and user-friendly interface. Control the temperature, operating mode and ventilation speed. Access forecasts (via the Webserver Airzone Cloud connection) to anticipate weather changes.

### Airzone Lite thermostat

Wired or wireless connection: Within an installation with the Blueface interface, this is the ideal solution for rapid access to main functions. Its modern and fun interface uses colors to indicate the mode and zone temperature. Zone start/stop function. Control the temperature setting by 1°C increments with amplitudes of ±3°C.

### Airzone Cloud webserver

The Airzone Cloud application for smartphone, tablet and PC offers full remote control of the installation anywhere, anytime! Several servers and up to 32 systems can be controlled simultaneously with a single webserver. All your thermostat functions are located in the Cloud: Temperature control, timer, Weather forecasts, access rights...

There are two versions of plenums available: standard version (300 mm) and medium version with new air supply (250 mm). Plenum dimensions are indicated under the reference.

Simple and quick to install, the cassette is the ideal solution for offices and small shops. Available in 600 x 600 or 800 x 800 versions, their independent 4-way air delivery provide optimum comfort levels. Pre-charged with R32 or R410A, our ranges provide you with a solution regardless of the regulatory constraints facing your projects.

# Light Commercial Cassette R32

Design and comfort

## Condensate pump included

The Small Commercial Cassette includes its own condensate pump for immediate elimination. This means no other elements need to be added to the installation. (Fig. 1)

## Motion sensor

Air-conditioning with no wasted consumption thanks to the motion sensor which gradually reduces equipment energy consumption when the room is empty and switches on again when movement of people is detected.

## Improved comfort

This equipment can be used to select the location where the temperature setting should be measured (on the controller, the recirculation or with the average of both values). This feature ensures superior comfort levels in the room.

## Flexible installation

The equipment can be installed in any location within the building because refrigerant pipe lengths go up to 30 m between the indoor unit and the outdoor unit. The height difference between the two can also go up to 20 m. Measuring 600 x 600 mm, they can be integrated in standard ceiling tiles.

## Compatible with the Hi Kumo remote control

This application allows you to turn the unit on or off, raise or lower the temperature or set the timer from wherever you may be around the world. All you need is a smartphone, an Internet connection and Wi-Fi equipment (optional) to connect to the indoor unit.

## Individual louver control

The cassette's 4 louvers can be configured separately with the SPX-WKT3 so that each one operates in a certain way: by delivering air directly towards the user, directing it to the ceiling, floor etc. This means comfort is guaranteed. (Fig. 2)

# Primary R32

R32 ecofriendly option for your commercial applications

Primary R32

## Temperature compensation

On the cassette model, heat compensation is an option via a wired controller. This function can compensate air stratification to ensure a level of comfort in the entire room, regardless of the height of the ceiling. (Fig. 1)

## Efficiency guaranteed

The Primary cassette range performances are guaranteed in cooling and heating until an outside temperature of -15°C. The DC Inverter technology precisely adjusts the required heating capacity and ensures the installation's comfort and durability.

## Wireless controller supplied

Wireless controller supplied, compatible with wired remote. (Fig. 2)

## New air intake

New air intake is available, improving air quality indoors.

## Compatible with technical room applications

The unit is fitted as standard with free inputs / outputs for a fault report or for remote start/stop control. Ideal for installation in a service room.

# Primary R410A

Perfect fit for your commercial applications

Primary R410A

## Temperature compensation

On the cassette model, heat compensation is an option via a wired controller. This function can compensate air stratification to ensure a level of comfort in the entire room, regardless of the height of the ceiling. (Fig. 1)

## Efficiency guaranteed

The Primary cassette range performances are guaranteed in cooling and heating until an outside temperature of -15°C. The DC Inverter technology precisely adjusts the required heating capacity and ensures the installation's comfort and durability.

## Wireless controller supplied

Wireless controller supplied, compatible with wired remote (Fig. 2)

## New air intake

New air intake is available, improving air quality indoors.

## Compatible with technical room applications

The unit is fitted as standard with free inputs / outputs for a fault report or for remote start/stop control. Ideal for installation in a service room.

Cassette

# Micro VRF IVX Comfort 600 x 600

A compact VRF solution to meet larger technical constraints

## Low sound level

Thanks to its 4 ventilation speeds, the 600 x 600 cassette is one of the quietest on the market.

## Customizable individual comfort

The GENTLE COOL function can be accessed with the new wired controllers for customized comfort. In summer, cold drafts are avoided thanks to adjustable minimal delivery temperature programming.

## Unmatched comfort

Independent control of air delivery louvers and COANDA effect air distribution to completely remove any sensation of discomfort.

## Energy savings

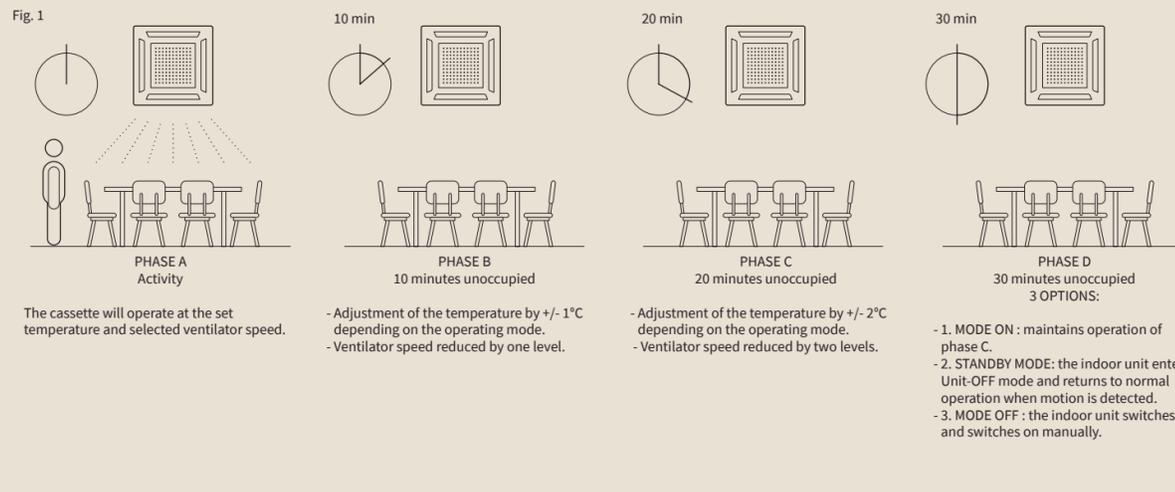

The motion sensor (optional) optimizes comfort automatically while at the same time limiting energy consumption in areas which are not permanently occupied. It continuously analyses differences in heat and the presence of people in the room and adjusts its temperature setting (drop up to 2°C), ventilation speed and air flow direction. (Fig. 1)

## Easy installation

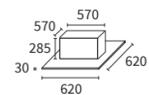

The 600 x 600 integrates perfectly in suspended ceilings thanks to its compact design (570 x 570mm recess) and its non-overlapping panel. All cassettes also come with a pump for removing condensate up to 850 mm.

## Compact

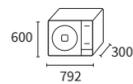

The outdoor units are exceptionally compact, taking up just 0.23m<sup>2</sup> of floorspace.

With its extended air delivery range, the Ceiling-mounted system is an ideal solution for long office spaces and commercial premises. Fitted to the ceiling means floorspace can be saved.

With guaranteed heating until  $-15^{\circ}\text{C}$  for the Primary range and  $-20^{\circ}\text{C}$  for the IVX Comfort range, this solution ensures genuine occupant comfort.

# Primary R32 (Floor-Ceiling)

R32 ecofriendly option for your commercial applications

### Flexible positioning

The unit can be installed on the floor or on the ceiling. The Hitachi Primary range console can be installed both on the floor and on the ceiling, allowing the user to choose the most optimal room location for maximum comfort. (Fig. 1)

### Efficiency guaranteed

The Primary ceiling range performances are guaranteed in cooling and heating until an outside temperature of -15°C. The DC Inverter technology precisely adjusts the capacity required to heat commercial premises and ensures the installation's comfort and durability.

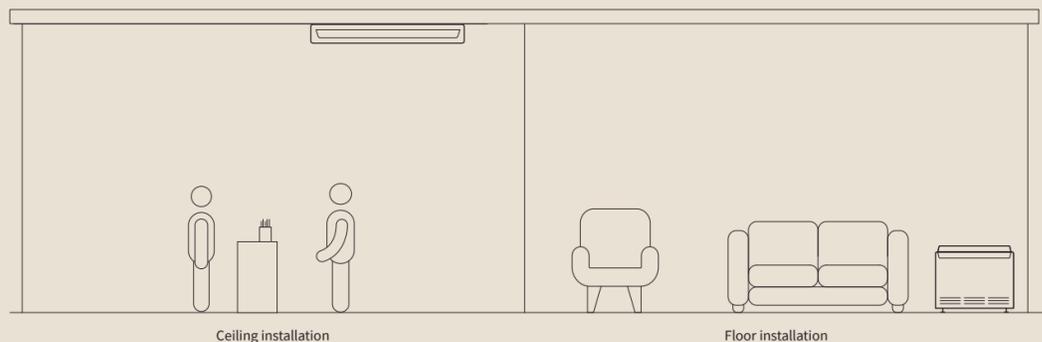

### Compatible with technical room applications

The unit is fitted as standard with free inputs / outputs for a fault report or for remote start/stop control. Ideal for installation in a service room.

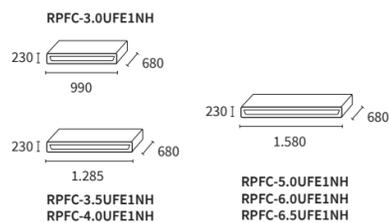

### New air intake

New air intake improves air quality indoors.

## Compatible controls and accessories

Discover Primary

# Micro VRF IVX Comfort

A compact VRF solution to meet larger technical constraints

## Compact

The outdoor units are exceptionally compact, taking up just 0.23m<sup>2</sup> of floorspace.

## Easy installation

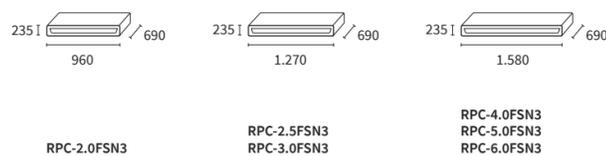

There are a range of options available to facilitate your installation:

- different types of electrical power supply
- wide operating range
- long pipe length
- on/off switches and fault report available
- compatible with all System Free control systems

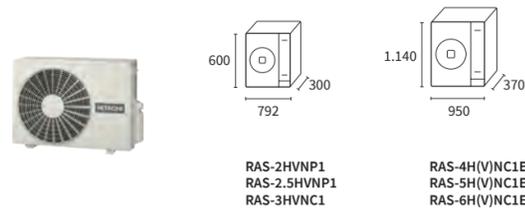

## Energy savings

The presence sensor (optional) optimizes comfort automatically while at the same time limiting energy consumption in areas which are not permanently occupied. It continuously analyses differences in heat and the presence of people in the room and adjusts its temperature setting (drop up to 2°C), ventilation speed and air flow direction.

# Benefits Multi-splits

## 1 Discrete and harmonious design

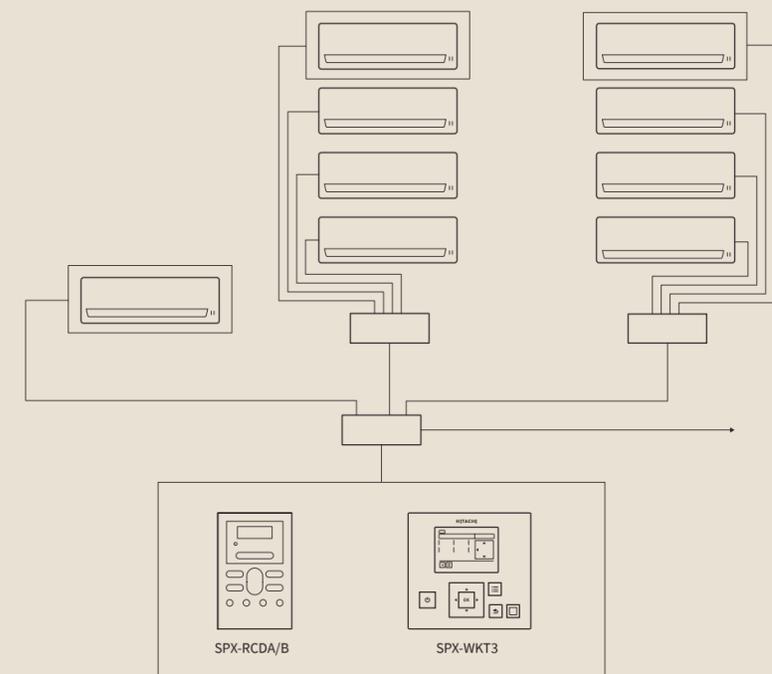

Thanks to their harmonized design, the Shirokuma and Takai consoles are perfectly suited to all interiors.

## 2 Simplified maintenance and installation

- The ducted type units adapt the static pressure according to the requirements of individual installations.
- The bi-split outdoor units are delivered pre-charged with R32 refrigerant. No additional refrigerant is required. This means savings on installation costs and times.
- Alarm codes are indicated on the remote control, saving troubleshooting time.

## 3 Regulation solutions for centralized installation control

- Centralized control of up to 13 indoor units with the SPX-WTK3 wired control unit and SPX-DST1 + SPX-WDST8M box

<sup>(1)</sup> Data includes defrosting. For the data corresponding to your project, use our technical catalogs or the Hi-ToolKit for business software.

## Please note

The returned capacity of each indoor unit depends on the outdoor unit, the selected combination, pipe length and outdoor temperature. The pipe length used to determine the values above is 10m. Total capacity cannot exceed the unit capacity; please refer to the combination table. For more information on selecting, please refer to our technical documentation or use the Hi-ToolKit software.

Indoor units are powered with 220-230 V from the outdoor unit.

# Multi-splits

Indoor units

Takai wall

## Takai wall range

Perfectly suited to all installation types, with special models available for smaller surface areas. The size 18 model can be switched to reduce capacity (1.8 kW > 1.2 kW\* cooling and 2.5 kW > 1.8 kW\* heating).

## Presence sensor

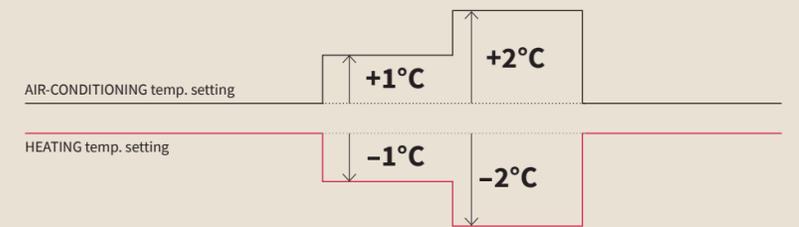

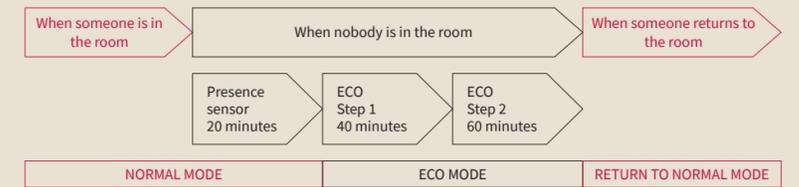

It adjusts indoor unit operation depending on whether anyone is in the room. See Eco Sensor illustration opposite.

## Ultra-efficient filtration

STAINLESS pre-filters and Active Carbon filters as standard.

## Extra quiet units

20 dB(A) for size 25.

## Shirokuma console

Multi-splits

### Extended air flow

Thanks to a larger **dynamic air flow**, air can reach all parts of the room. The room is air-conditioned (heating or cool air) at the touch of a button on the remote control. (Fig. 1)

### High performance

The console's energy class is A+++.  
 Energy savings - guaranteed!

### Compatible with Hi Kumo

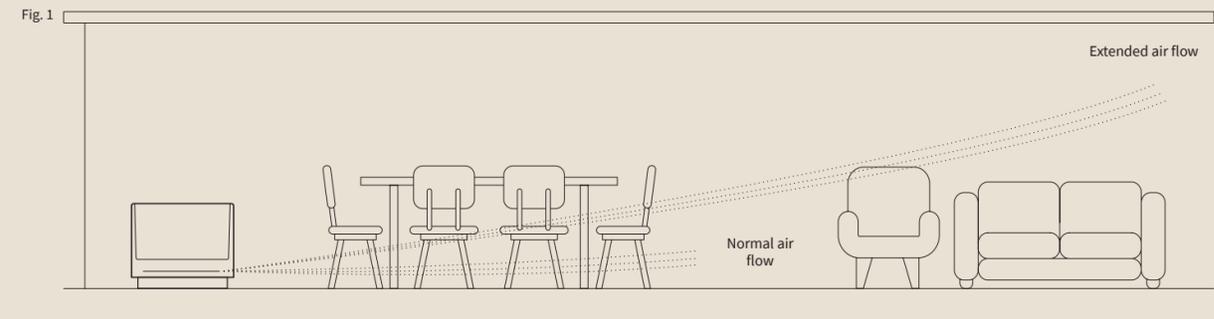

The entire Hitachi residential range is compatible with the Hi Kumo system which can control equipment from **any mobile device** which acts as a remote control.

### Control options

The console comes with an infrared remote control as standard. It is also compatible with the SPX-WKT3 wired control with timer.

### Flexibility with the Multi-splits range

The Shirokuma console indoor unit is compatible with all outdoor units multi-splits. This means that several indoor units can be installed in different rooms with the same outdoor unit.

# Connected and user-friendly interfaces

## Airzone Blueface thermostat

Wired connection/3.5" touchscreen: Configurable as Main or zone thermostat. Numerous functions and settings, ideal for maximum control of your entire system: more efficient and responsible heating. Complete and user-friendly interface. Eco-adapt function and standby function for real energy savings. Control the temperature, operating mode and ventilation speed. Timer. Access forecasts (via the Webserver Airzone Cloud connection) to anticipate weather changes.

## Airzone Think thermostat

Wired or remote connection/2.7" screen: Configurable as Main or zone thermostat. Low consumption device: the easy way to cut energy costs. Attractive and user-friendly interface. Control the temperature, operating mode and ventilation speed. Access forecasts (via the Webserver Airzone Cloud connection) to anticipate weather changes.

## Airzone Lite thermostat

Wired or remote connection: Within an installation with the Blueface interface, this is the ideal solution for rapid access to main functions. Its modern and fun interface uses colors to indicate the mode and zone temperature. Zone start/stop function. Control the temperature setting by 1°C increments with amplitudes of ±3°C.

## Airzone Cloud webserver

The Airzone Cloud application for smartphone, tablet and PC offers full remote control of the installation anywhere, anytime! Several servers and up to 32 systems can be controlled simultaneously with a single webserver. All your thermostat functions are located in the Cloud: Temperature control, timer, Weather forecasts, access rights...

Dodai 2 outdoor units

Outdoor units	Unit	RAM-40NE2F	RAM-53NE2F	RAM-53NE3F
Number of connectible units (min-max)		2 / 2		2 / 3
Capacity Cooling (min-max)	kW	4,0 (1,5-4,4)		5,3 (1,5-6,0)
Capacity Heating (min-max)	kW	5,1 (1,5-5,5)		6,3 (1,5-6,6)
Absorbed nom. capacity Cooling (min-max)	kW	1,026 (0,25-1,27)	1,293 (0,35-1,71)	1,293 (0,35-2,16)
Absorbed nom. capacity Heating (min-max)	kW	1,243 (0,25-1,70)		1,615 (0,35-2,25)
EER/COP		3,90 / 4,10		4,10 / 3,90
SEER/SCOP (medium climate)		8,25 / 4,30		8,10 / 4,10
Seasonal energy class (Cooling/Heating)			A++/A+	
Sound Pressure Cooling	dB(A)	49		50
Sound pressure	dB(A)	60		61
Air flow (Cooling/Heating)	m <sup>3</sup> /h	1620 / 1620		2160 / 2160
Dimensions (HxWxD)	mm	570 x 750 x 280		750 x 850 x 298
Weight	kg	41	51	52
Electrical power			220 - 230V	
Maximum current	A	6		8
Cable diameter (EN 60 335-1)	mm <sup>2</sup>		2 x 2,5 +T	
Indoor/outdoor wiring section	mm <sup>2</sup>		3 x 1,5 +T	
Pipe diameter (Liq/gas)	inch		(1/4" x 2 / 3/8" x 2)	
Initial refrigerant charge	kg	0,93		1,59
Pre-charged for	m		35	
Minimum length	m		3	
Maximum length/Additional refrigerant	m/g/m		35/-	45/20
Maximum height difference	m	10		20
Operating range Cooling	°C		-10°C / 46°C	
Operating range Heating	°C		-15°C / 24°C	
Refrigerant			R32	
Compressor			Rotatif	

# Multi-splits

Indoor units

Dodai 2 wall

## Compatible with the Hi Kumo remote control

This application allows you to turn the unit on or off, raise or lower the temperature or set the timer from wherever you may be around the world. All you need is a smartphone, an Internet connection and Wi-Fi equipment (optional) to connect to the equipment.

## Maximum space savings

It's small enough for discrete installation. Above a door, for example, because it is only 780 mm wide. (Fig. 1)

## Silent operation

Enjoy complete comfort without even noticing that the indoor unit is on, thanks to its low sound level of only 19dB\*.

Fig. 1

Indoor units	Unit	RAK-15QE*	RAK-18REF	RAK-25REF	RAK-35REF	RAK-50REF
Capacity Cooling (min-max)	kW	1.50 (0.90 - 2.00)	1.8 (0.90 - 2.50)	2.50 (0.90 - 3.10)	3.50 (0.90 - 4.00)	5.00 (1.90 - 5.20)
Capacity Heating (min-max)	kW	2.00 (1.00 - 2.50)	2.50 (0.90 - 3.20)	3.40 (0.90 - 4.40)	4.20 (0.90 - 5.00)	6.00 (2.2 - 7.30)

## Refrigerant lengths

### RAM-90NP5E

L1 + L2 + L3 + L4 + L5 = Maximum 75 m ; L1 < 25 m ; L2 < 25 m ; L3 < 25 m ; L4 < 25 m ; L5 < 25 m  
 Maximum height between the highest indoor unit and the lowest indoor unit: 5 m. Pre-charged for 30 m.  
 Additional 15 g/m required beyond 30 m. Always connect the most powerful indoor unit to the lowest connector  
 Connector 3 is designed for indoor units 18, 25 or 35. Otherwise, a 3/8 to 1/2 adapter is required.

Hitachi heating and air-conditioning systems feature a range of control solutions adapted to all applications. Many options are available in both residential and small commercial: wired or wireless controllers, control from a smartphone, remote maintenance, fault report kits and dry contacts.

# Air to Air Heat Pumps : Controls and Accessories

\* JOHNSON CONTROLS - HITACHI AIR CONDITIONING EUROPE SAS participate in the Eurovent Certification Program for the AC/VRF/LCP-HP categories. Information on certified models can be found in the Eurovent Directory ([www.eurovent-certification.com](http://www.eurovent-certification.com)).

# Air to Air control range

## Wired controllers optional

### Weekly wired controller

- The wired controller with weekly programming was designed to offer the maximum number of functions while ensuring ease of use.
- Clear display of all settings in different languages (5 including French).
- Simplified navigation via menus and navigation button.
- Alarm code: Alarm on the indoor unit or outdoor unit. Type of alarm
- Alarm history.
- Controller blocking option.
- Option for limiting the setpoint ranges and blocking the mode.
- Weekly programming: 5 ranges per day with different set points. Simple programming copying option.
- Away from home function: Up to 99 days of absence. Set point can be adjusted from 10 to 16 °C.
- Consumption indication.

Compatibility	All Air to Air R32 and Triple-C ranges
Price	

### Simplified wired controller

- The simplified wired controller was developed for hotel, retirement home, office applications etc. where the user needs simple and restricted access to the main functions.
- On/Off.
- Mode changing (summer/winter/auto/ventilation/dehumidification).
- Setpoint modification.
- Changing ventilation speeds.
- 12 hour timer or sleep function.
- Centralized control option (see SPX-DST1).

Compatibility	RAD-18QPE RAD-25-60RPE RAD-70PPD	RAK-50RPE1 RAK-60RPE RAK-70PPD	RAI-RPE
Price			

\* Temperature setting adjustment option (10 - 16 °C).

## Probes and contacts

### DRY contact kit only

For remote on/off function.

Reference	<b>SPX-WDC2</b>	<b>SPX-WDC3</b>
Compatibility	RAI-RPE RAD-QPE/RPE RAD-PPD	RAK-QPE/ RAK-RPE/RAK-RXE RAF-RXE/RAK-PSE(W/S) RAK-QXE/RAK-REF
Price (all models)		

### Fault report kit only

This accessory can send a 5 V signal in the event of a fault on the indoor unit. This kit includes a cable (SPX-WDC7) and box (HA-S100TSA to connect).

Reference	<b>SPX-WDC7 + HA-S100TSA</b>	
Compatibility	RAK-QXE/RAK-RXE/RAK-QPE/RAK-RPE RAF-RXE/RAK-REF/RAI-RPE/RAD-RPE	
Price	SPX-WDC7:	HA-S100TSA:

### Fault report kit + dry contact

This accessory can send a 5 V signal in the event of a fault on the indoor unit and offers a remote on/off function. This kit includes a cable (SPX-WDC5 or SPX-WDC6) and box (HA-S100TSA to connect).

Reference	<b>SPX-WDC5 + HA-S100TSA</b>	<b>SPX-WDC6 + HA-S100TSA</b>
Compatibility	RAK-PSE/RAK-QXE/RAK-RXE RAK-QPE/RAK-RPE RAF-RXE/RAK-REF	RAI-QPE/RAD-QPE
Price (all models)	SPX-WDC5 or SPX-WDC6: HA-S100TSA:	

### Fault report kit + operating information

This accessory features 2 outputs. The 1st can send a 220V signal in the event of a fault on the indoor unit. The 2nd can send a 220V signal when the indoor unit is operating.

Reference	<b>SPX-WDC8</b>
Compatibility	RAK-RXE/RAK-RPE/RAI-RPE/RAD-RPE/RAK-QXE RAK-QPE/RAK-REF/RAK-PPD/RAD-PPD
Price	

### Remote sensor for ducted multi-splits

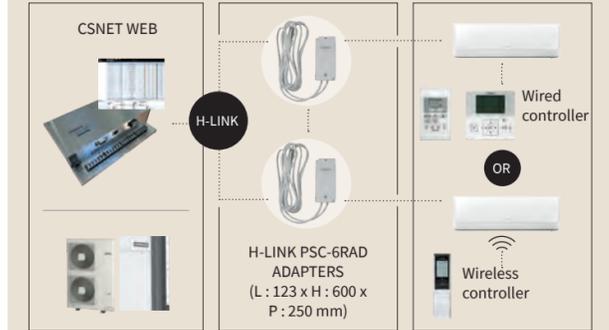

Featuring a remote sensor, the indoor unit is controlled based on ambient temperature.

Reference	<b>SPX-RTH1</b>
Compatibility	RAD-RPE
Price	

## GTC control

### H-LINK box

For connecting indoor units on the Lorai Air Pur, Takai, Mokai, Dodai 2 ranges to a H-Link network.

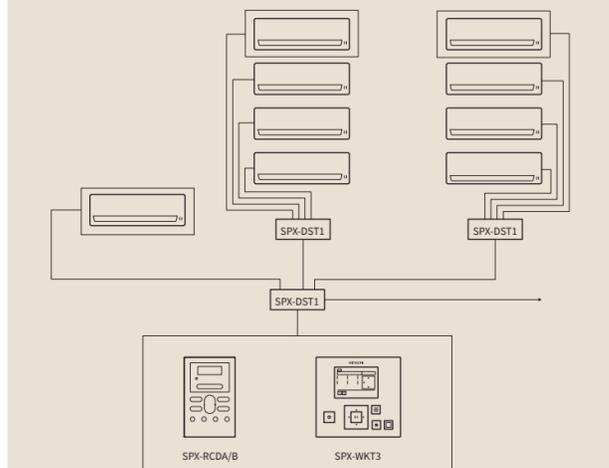

Reference	<b>PSC-6RAD</b>
Compatibility	RAK-PSE/RAK-RXE/RAK-RPE/RAK-QXE/RAK-PPD RAK-QPE/RAF-RXE/RAD-QPE/RAI-RPE
Price (all models)	

## Centralized control

### Multi-indoor unit box

- Combined with a weekly wired controller (SPX-WKT3) or simplified wired controller (SPX-RCDA/B), it can control up to 4 indoor units.
- These indoor units all operate in the same mode and with the same setpoint.
- Up to 4 SPX-DST1 can be connected to control up to 13 indoor units.
- To connect the SPX-DST1 box to the indoor unit, the following cable needs to be ordered: SPX-WDST8M (length: 8 m - 1 cable per indoor unit).

Reference	<b>SPX-DST1 + SPX-WDST8M</b>
Compatibility	RAK-RXE/RAK-PPD/RAF-RXE/RAF-RXE/RAK -RPE/RAK-RXE RAK-PSE(W/S)/RAI-RPE/RAD-RPE/RAD-QPE/RAI-QPE
Price (all models)	<b>SPX-DST1:</b> <b>SPX-WDST8M:</b>

\* Only a HA-S100TSA box required for these references. The SPX-WDC7 is not required.

# Hi Kumo PRO

The remote maintenance solution for the entire residential and small commercial range.

## Why choose Hi Kumo PRO?

Based on the Hi Kumo solution, Hi Kumo PRO goes even further. It enables your installation engineer or maintenance company to offer your client a service with high added value: remote maintenance. Access to operating data is just a few clicks away on an online platform in the event of a breakdown or malfunction. No more lost time and repeated call outs. The problem can be sorted out remotely, very quickly and perhaps even before your client is affected. This means productivity gains for you and satisfied customers!

## Functions

Quick troubleshooting to optimize interventions thanks to an easy user-friendly interface.

### Real-time access to machine operating data\*

- Operating status/mode
- Current temperature setting
- Gas/backflow/evaporation temperatures
- Compressor current/frequency
- Water flow and temperatures
- Pump speed
- V3V position

### Access to the entire installation fleet:

- Card or listing display
- Favorite installations option

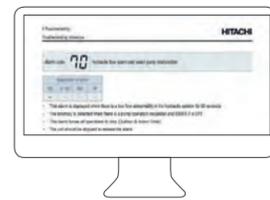

### Access a 3 month history, simultaneous display of 6 settings from a selection of over 80 including:

- Operating statuses
- Alarms
- Compressor frequency
- Flows/Temperatures...

Gateway status, restart and update.

### Alarm information and troubleshooting assistance:

- Automatic email notification
- Online access to its description and troubleshooting assistance
- Download the troubleshooting guide and send it live to the technician on site

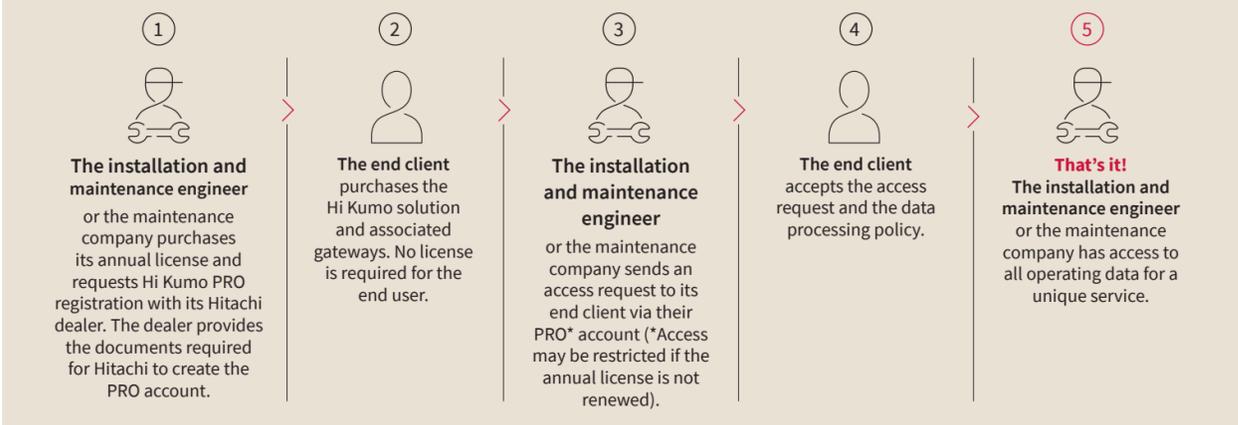

### Remote control:

- Access the same control functions as the Hi Kumo solution except weekly programming.

<https://hi-kumopro.com/#/login>

\* For the Air - Air products, access to indoor unit data only

## How do I benefit from the Hi Kumo PRO service?

### AIR - AIR Heat pump communication gateways

SPX-WFG01 Wifi direct gateway\* or SPX-TAG01 + AHP-SMB-01 Wireless gateway + Hi-Box\* + Annual license (for the maintenance company). Ask their Hitachi dealer

\*10 max/account and 20 wireless gateways/Hi-Box

## Hi Kumo

IOS and Android application

## Even more services for the end client with

Control all your new Hitachi residential equipment remotely with a single application.

## Functions

### AIR to AIR Heat pump

- On/Off
- Temperature management
- Ventilation speed
- Swing direction selection
- Weekly programming
- Fault code display...

The Hi Kumo allows you to control the entire Hitachi heat pump range remotely, including Air - Air or Air - Water or Thermodynamic Tank. It provides the end user with genuine comfort through a simple and user-friendly application. Do you think you might have forgotten to switch off the air-conditioning before going out? Do you want to cool down or warm up the place before coming home? It couldn't be easier with the Hi Kumo application!

## Tahoma® by Somfy

The entire Hitachi residential range is now compatible with Tahoma® by Somfy.

Somfy® home automation box
